Gelber, 2020-06-23 A comprehensive history of evaluation in American higher education In *Grading the College* Scott M Gelber offers a comprehensive history of evaluating teaching and learning in higher education He complicates the conventional narrative that portrays evaluation as a newfangled assault on the integrity of higher education while acknowledging that there are many compelling reasons to oppose those practices The evaluation of teaching and learning Gelber argues presented genuine dilemmas that have attracted the attention of faculty members and academic leaders since the 1920s Especially during the peak era of faculty authority that followed the end of the Second World War significant numbers of professors and administrators believed that evaluation might improve institutional performance reduce the bias inherent in traditional methods of supervision strengthen communication with laypersons and encourage a more deliberate focus on the distinctive goals of college Gelber reveals the extent to which professors and academic interest groups participated in the development of our most common evaluation instruments including student course questionnaires achievement tests surveys rubrics rankings and accreditation self studies Although these efforts may seem distant from the present era of shortsighted scrutiny and ill conceived comparisons Gelber demonstrates that the evaluation of college teaching and learning has long consisted of a set of intellectually sophisticated questions that have engaged and could continue to engage faculty members and their advocates By providing a deeper understanding of how evaluation operated before the dawn of high stakes accountability *Grading the College* seeks to promote productive conversations about current attempts to define and measure the purposes of American higher education

Identity and Internationalization in Catholic Universities Hans de Wit, Andrés Bernasconi, Visnja Car, Fiona Hunter, Michael James, Daniela Véliz, 2018-08-02 *Identity and Internationalization in Catholic Universities* explores the relationship between Catholic identity mission and internationalization in Catholic universities of different types and located in different contexts Internationalization is a key concern for universities working to achieve their goals in different regions of the world but without neglecting their identity

There are many universities that consider themselves related to the Roman Catholic faith and many other universities with Christian affiliations. It is well known that Catholic universities have unique missions such as the formation of individuals inspired by a religious conviction to serve society and the church. That is why it is imperative to have empirical knowledge to help develop practical and effective policies on central themes such as internationalization, a fundamental part of many universities' developmental strategies while paying special attention to each university's specific context. This book includes sixteen case studies from Latin America, the United States, the Asia Pacific, and Europe and also includes chapters on regional perspectives on Catholic higher education as well as more specifically Jesuit higher education, the global network of La Salle universities, and internationalization in the United States, Latin America, the Asia Pacific region, and Europe.

Critical Essays in Sport Management Andy Gillentine, Robert Baker, Jacquelyn Cuneen, 2017-09-29 This collection of essays written by a number of respected sport management scholars addresses many of the challenges and issues facing today's sport management academic programs. It is intended to begin a professional and scholarly discussion to identify the best or at least the most logical paths to follow for sport management programs and the industry with which they are so closely aligned. Contributors invited to participate based on their recognized areas of expertise address specific topics using their own unique voices and writing styles. In the ebook version, essays link to video introductions by the authors and to online discussion forums where readers can respond to the issues presented in the essays.

From the Preface: The field of sport management stands at an academic crossroads; the essays in this book address the following and other emerging questions: Should our successful field of study continue to model other disciplines and perpetuate their successes as well as their shortcomings, or should we determine our own specific model for academic success? How are we doing in preparing future sport managers to perform in the industry and on the global stage? Where do we belong in the scheme of academe? The book's goal is to generate discussion among sport management professors, industry professionals who serve as adjunct faculty and participate on sport management program advisory boards, doctoral students who intend to teach in sport management programs, and others who explore and critique higher education in general.
