

Unit or Lesson Title:	Genetics—Probability
Grade Level	10 th grade
Topic/Theme/ Nature of the Investigation:	Students will learn the different types of genetic traits and how the traits combine. They will then predict the probability that two people can have children with particular traits.
NGSS Performance Expectation(s)	HS-LS3-3. Apply concepts of statistics and probability to explain the variation and distribution of expressed traits in a population. [Clarification Statement: Emphasis is on the use of mathematics to describe the probability of traits as it relates to genetic and environmental factors in the expression of traits.] [Assessment Boundary: Assessment does not include Hardy-Weinberg calculations.]
NGSS Dimension 1 component	<u>Asking Questions and Defining Problems</u> Asking questions and defining problems in 9-12 builds on K-8 experiences and progresses to formulating, refining, and evaluating empirically testable questions and design problems using models and simulations. • Ask questions that arise from examining models or a theory to clarify relationships. (HS-LS3-1)
NGSS Dimension 2 component	<u>Developing and Using Models</u> Modeling in 9–12 builds on K–8 experiences and progresses to using, synthesizing, and developing models to predict and show relationships among variables between systems and their components in the natural and designed worlds. • Use a model based on evidence to illustrate the relationships between systems or between components of a system. (HS-LS1-4)

Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners Cheryll M. Adams, Alicia Cotabish, Debbie Dailey, 2021-09-23 A Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners provides teachers and administrators with practical examples of ways to build comprehensive coherent and rigorous science learning experiences for gifted and advanced students from kindergarten to high school. It provides an array of examples across the four domains of science: physical sciences, Earth and space sciences, life sciences, and engineering technology and applications of science. Each learning experience indicates the performance expectation addressed and includes a sequence of activities, implementation examples, connections to the CCSS Math and CCSS ELA, and formative assessments. Chapters on specific instructional and management strategies, assessment, and professional development suggestions for implementing the standards within the classroom will be helpful for both teachers and administrators.

Design, Selection, and Implementation of Instructional Materials for the Next Generation Science Standards National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Science Education, 2018-04-02 Instructional materials are a key means to achieving the goals of science education: an enterprise that yields unique and worthwhile benefits to individuals and society. As states and districts move forward with adoption and implementation of the Next Generation Science Standards (NGSS) or work on improving their instruction to align with A Framework for K-12 Science Education, the Framework instructional materials that align with this new vision for science education have emerged as one of the key mechanisms for creating high-quality learning experiences for students. In response to the need for more coordination across the ongoing efforts to support the design and implementation of instructional materials for science education, the National Academies of Sciences, Engineering, and Medicine convened a public workshop in June 2017. The workshop focused on the development of instructional materials that reflect the principles of the Framework and the NGSS. This publication summarizes the presentations and discussions from the workshop.

The Go-To Guide for Engineering Curricula, Grades 9-12 Cary I. Sneider, 2014-12-05 How to engineer change in your high school science classroom. With the Next Generation Science Standards, your students won't just be scientists; they'll be engineers. But you don't need to reinvent the wheel. Seamlessly weave engineering and technology concepts into your high school math and science lessons with this collection of time-tested engineering curricula for science classrooms. Features include: A handy table that leads you straight to the chapters you need. In-depth commentaries and illustrative examples. A vivid picture of each curriculum, its learning goals, and how it addresses the NGSS. More information on the integration of engineering and technology into high school science education.

Using STEM-Focused Teacher Preparation Programs to Reimagine Elementary Education Cayton, Emily, Sanders, Miriam, Williams, John A., 2024-02-07 There has been an increasing issue in STEM education as many students lack interest and knowledge in STEM.

disciplines and fields Given the high demand for STEM workers and the projected growth of STEM fields it is important to expose students to STEM education beginning as early as elementary school Some K 6 programs are not preparing teacher candidates adequately for STEM content or skills especially in engineering Integrating these disciplines and practices throughout elementary education programs could result in more exposure for K 6 students Using STEM Focused Teacher Preparation Programs to Reimagine Elementary Education presents anecdotal stories of how elementary education programs have altered their content offerings field experiences and curricula to expand their teacher candidates knowledge and exposure to STEM disciplines and fields Covering key topics such as diversity teacher education and technology integration this premier reference source is ideal for industry professionals policymakers administrators of K 12 education pre service teachers teacher educators researchers scholars academicians practitioners instructors and students *Guide to Implementing the Next Generation Science Standards* National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Guidance on Implementing the Next Generation Science Standards, 2015-03-27 A Framework for K 12 Science Education and Next Generation Science Standards NGSS describe a new vision for science learning and teaching that is catalyzing improvements in science classrooms across the United States Achieving this new vision will require time resources and ongoing commitment from state district and school leaders as well as classroom teachers Successful implementation of the NGSS will ensure that all K 12 students have high quality opportunities to learn science *Guide to Implementing the Next Generation Science Standards* provides guidance to district and school leaders and teachers charged with developing a plan and implementing the NGSS as they change their curriculum instruction professional learning policies and assessment to align with the new standards For each of these elements this report lays out recommendations for action around key issues and cautions about potential pitfalls Coordinating changes in these aspects of the education system is challenging As a foundation for that process *Guide to Implementing the Next Generation Science Standards* identifies some overarching principles that should guide the planning and implementation process The new standards present a vision of science and engineering learning designed to bring these subjects alive for all students emphasizing the satisfaction of pursuing compelling questions and the joy of discovery and invention Achieving this vision in all science classrooms will be a major undertaking and will require changes to many aspects of science education *Guide to Implementing the Next Generation Science Standards* will be a valuable resource for states districts and schools charged with planning and implementing changes to help them achieve the goal of teaching science for the 21st century
