Commissioning Great Britain: Parliament: House of Commons: Health Committee, 2011-01-18 This report on NHS Commissioning concludes that more effective commissioning is key to delivery of efficiency gains The NHS needs to make unprecedented efficiency gains if it is to meet rising demand for healthcare against the background of budgets which are broadly stable in real terms the Nicholson Challenge The White Paper proposal to abolish Primary Care Trusts and transfer commissioning responsibility to GP led consortia was not foreshadowed in the Coalition Programme and came as a surprise to most observers This surprise approach created uncertainty among commissioners and therefore increased the risks and costs associated with delivery of the Nicholson Challenge The report sets out the crucial issues which

the forthcoming Health Bill should address development of a commissioning structure which is both effective and accountable accountability must apply through ministers to Parliament as well as to patients and local communities effective and accountable commissioning requires the engagement of the entire clinical community GPs have a major role as a catalyst for this process but not as the ultimate arbiters of all commissioning decisions In addition commissioners will need to be able to adopt integrated service solutions which cross institutional boundaries when these offer best value consider innovative proposals for primary care as well as for hospital care consider more effective structures for managing the interface between the NHS and Social Care realise the benefits which may be available to patients from major service reconfiguration reconcile conflicts between enhanced patient choice and the commissioner's own financial and clinical priorities

services by regulatory bodies Over the years the authors have been asked the same questions and witnessed the same misunderstandings and mistakes by people supporting individuals with epilepsy So they looked at the common themes and the resources available It became clear that the information to address these gaps is available but not easily accessible There is lots of information in the public domain however much of it is factual rather than practical This book provides practical information and resources with the focus on what needs to happen how to make it happen and who needs to do it This book is useful for supporting people with epilepsy wherever they live both within and outside the United Kingdom
