*Handbook of Creativity* John A. Glover, Royce R. Ronning, Cecil R. Reynolds, 2013-03-09 The motivation underlying our development of a handbook of creativity was different from what usually is described by editors of other such volumes Our sense that a handbook was needed sprang not from a deluge of highly erudite studies calling out for organization nor did it stem from a belief that the field had become so fully articulated that such a book was necessary to provide summation and reference Instead this handbook was conceptualized as an attempt to provide structure and organization for a field of study that from our perspective had come to be a large scale example of a degenerating research program see Brown Chapter 1 The handbook grew out of a series of discussions that spanned several years At the heart of most of our interactions was a profound unhappiness with the state of research on creativity Our consensus was that the number of good works published on creativity each year was small and growing smaller Further we could not point to a journal text or professional organization that was providing leadership for the field in shaping a scientifically sound framework for the development of research programs in creativity At the same time we were casting about for a means of honoring a dear friend E Paul Torrance Our decision was that we might best be able to honor Paul and influence research on creativity by developing a handbook designed to challenge traditional perspectives while offering research agendas based on contemporary psychological views     The Unschooling Handbook Mary Griffith, 2010-05-05 To Unschoolers Learning Is As Natural As Breathing Did you know that a growing percentage of home schoolers are becoming unschoolers The unschooling movement is founded on the principle that children learn best when they pursue their own natural curiosities and interests Without bells schedules and rules about what to do and when the knowledge they gain through mindful living and exploration is absorbed more easily and enthusiastically Learning is a natural inborn impulse and the world is rich with lessons to be learned and puzzles to be solved Successful unschooling parents know how to stimulate and direct their children s learning impulse Once you read this book so will you     The American Booksellers Guide ,1874     Innovative Curriculum Materials ,1999
