Direction of Magnetic Fields

- **We can find the direction of a magnetic field.** We can find the direction of a magnetic field quite simply by using **force**. This 'force' is the force that will act on the north pole of the magnet from that point.

Fig 2. Field Lines Around A Bar Magnet.

Magnetic Fields

- **Magnetic field lines run from north to south.** If we take a bar magnet (or any permanent magnet), we can plot the field lines around the magnet. These **field lines** will denote the shape of the magnetic field. The important thing to remember is that these field lines will run from the north pole of the magnet to the south pole of the magnet.
