

QUESTION 15

As can be seen above, when a negatively charged rod is brought near an uncharged body, it attracts positive charges to the end of the body closer to the rod and repels negative charges to the opposite end. Once the end with negative charges is touched with the finger, the charges flow to earth. When the finger is removed and negative rod removed, the net positive charge distributes itself throughout the conductor.

- (c) (i) fig I $\rightarrow$ dc electrical circuit
 fig II $\rightarrow$ Alternating current circuit

(ii) electric current is the same

(iii) From fig I: External resistance, $R = \left[\frac{2\Omega // 2\Omega + 2\Omega}{\left[\frac{2 \times 2}{2+2} \right] + 2} \right]$
 $R = 3\Omega$

Internal resistance, $r = 0.1 + 0.1 = 0.2\Omega$

E.m.f, $E = 1.5V + 1.5V = 3V$

Current, $I = \frac{E}{R+r} = \frac{3}{3+0.2} = \frac{3}{3.2} = 0.9375A$

Heidegger and the Contradiction of Being Filippo Casati, 2021-11-29 This book offers a clear analytic and innovative interpretation of Heidegger's late work This period of Heidegger's philosophy remains largely unexplored by analytic philosophers who consider it filled with inconsistencies and paradoxical ideas particularly concerning the notions of Being and nothingness This book takes seriously the claim that the late Heidegger endorses dialetheism namely the position according to which some contradictions are true and shows that the idea that Being is both an entity and not an entity is neither incoherent nor logically trivial The author achieves this by presenting and defending the idea that reality has an inconsistent structure In doing so he takes one of the

most discussed topics in current analytic metaphysics grounding theory into a completely unexplored area Additionally in order to make sense of Heidegger s concept of nothingness the author introduces an original axiomatic mereological system that having a paraconsistent logic as a base logic can tolerate inconsistencies without falling into logical triviality This is the first book to set forth a complete and detailed discussion of the late Heidegger in the framework of analytic metaphysics It will be of interest to Heidegger scholars and analytic philosophers working on theories of grounding mereology dialetheism and paraconsistent logic

entanglement theory trapped ions and quantum metrology and open quantum systems subject to decoherence The contributing authors have been chosen not just on the basis of their scientific expertise but also because of their ability to offer pedagogical and well written contributions which will be of interest to students and established researchers *The Teleology of Reason* Courtney D. Fugate, 2014-05-08 This work argues that teleological motives lie at the heart of Kant's critical philosophy and that a precise analysis of teleological structures can both illuminate the basic strategy of its fundamental arguments and provide a key to understanding its unity It thus aims through an examination of each of Kant's major writings to provide a detailed interpretation of his claim that philosophy in the true sense must consist of a teleologia rationis humanae The author argues that Kant's critical philosophy forged a new link between traditional teleological concepts and the basic structure of rationality one that would later inform the dynamic conception of reason at the heart of German Idealism The process by which this was accomplished began with Kant's development of a uniquely teleological conception of systematic unity already in the precritical period The individual chapters of this work attempt to show how Kant adapted and refined this conception of systematic unity so that it came to form the structural basis for the critical philosophy
