Kumar Saxena,Sukrit Mittal,Kalyanmoy Deb,Erik D. Goodman,2024-05-17 This book focuses on machine learning ML assisted
evolutionary multi and many objective optimization EM O EM O algorithms namely EM OAs iteratively evolve a set of
solutions towards a good Pareto Front approximation The availability of multiple solution sets over successive generations
makes EM OAs amenable to application of ML for different pursuits Recognizing the immense potential for ML based
enhancements in the EM O domain this book intends to serve as an exclusive resource for both domain novices and the
experienced researchers and practitioners To achieve this goal the book first covers the foundations of optimization including
problem and algorithm types Then well structured chapters present some of the key studies on ML based enhancements in
the EM O domain systematically addressing important aspects These include learning to understand the problem structure
converge better diversify better simultaneously converge and diversify better and analyze the Pareto Front In doing so this
book broadly summarizes the literature beginning with foundational work on innovization 2003 and objective reduction 2006
and extending to the most recently proposed innovized progress operators 2021 23 It also highlights the utility of ML
interventions in the search post optimality and decision making phases pertaining to the use of EM OAs Finally this book

shares insightful perspectives on the future potential for ML based enhancements in the EM OA domain To aid readers the book includes working codes for the developed algorithms This book will not only strengthen this emergent theme but also encourage ML researchers to develop more efficient and scalable methods that cater to the requirements of the EM OA domain It serves as an inspiration for further research and applications at the synergistic intersection of EM OA and ML domains
