Robert M L Winston :

Robert Winston: The Story of Science Robert Winston,2023-12-12 Delve into the stories of history s most influential scientific experiments inventions and life changing discoveries that have impacted our understanding and changed the world Let Professor Robert Winston take you on a scientific journey through human history as you learn the stories behind humanity s great inventions and discover everything that science has given us Robert Winston s Science That Changed the World features fascinating facts innovative inventions and daring discoveries Learn how random accidents have led to some of the greatest findings our world has ever seen and how anybody who dares to dream can be successful From the creation of dynamite and the world s first printer to magical medicine and the discovery of soap science really is the pioneering study that has the power to change everything

Human Instinct Lord Robert Winston,2011-05-31 From caveman to modern man Few people doubt that humans are descended from the apes fewer still consider let alone accept the psychological implications But in truth man not only looks moves and breathes like an ape he also thinks like one Sexual drive survival competition aggression all of our impulses are driven by our human instincts They explain why a happily married man will fantasize about the pretty slim young woman sitting across from him in the tube and why thousands of people spend their week entirely focused on whether their team will win their next crucial match But how well do our instincts equip us for the twenty first century Do they help or hinder us as we deal with large anonymous cities stressful careers relationships and the battle of the sexes In this fascinating book Robert Winston takes us on a journey deep into the human mind Along the way he takes a very personal look at the relationship between science and religion and explores those very instincts that make us human

What Makes Me Me? Robert M. L. Winston,2015 Why do you have brown eyes hairy fingers dangly earlobes or knuckles that crack Are you a thrill seeker a people person a computer whizz or a social wallflower with a morbid fear of spiders And if so who s to blame your parents or your genes This book provides an age appropriate tour of the tricky subject of biology and how genetic make up and experience makes everyone unique Find out what genes and chromosomes are for why some people are left footed but right eyed and what it takes to become an Olympic athlete or a chess grand master

What Goes On in My Head? Robert Winston,2010-09-20 What Goes On In My Head will introduce readers to the most powerful and complicated computer network they will ever encounter their own brain It explains what the different parts of the brain do how they work together and how scientists look at the brain What Goes On In My Head also explains how the brain changes at different stages in a person s life how you learn to do things what gives us our individual personalities what memory is and how illness affects the brain Learn about why we had moods and emotions why sleep is important and much much more What Goes On In My Head is packed with tips and brain teasers that will test memory perception reasoning and reactions Find out what really does go on in your brain

[Life Is Amazing](#) Robert Winston,2012-11-01 [Superhuman](#) Lori Oliwenstein,Robert Winston,2013-05-31 Accompanying the major new BBC documentary series Superhuman explores the

human body's astonishing ability to heal, renew and regenerate itself. In recording the before, during and after of radical operations on real people, it introduces us to the pioneering efforts of medical teams and alerts us to the ethical issues that new medical advances raise. Over six chapters, *Superhuman* addresses significant developments within six key medical areas: cancer, infection, transplantation, trauma, repair and reproduction. Acknowledging the debt modern physicians owe to yesterday, *Superhuman* begins by investigating the human body's innate abilities to heal itself. And as we gladly launch ourselves into an age of biotechnology, it questions whether we might now use all the information available to us to comprehend finally how our bodies work. If we can achieve that, perhaps becoming superhuman is truly within our reach.

Chapter one introduces us to the trauma surgeons who have discovered that the shock that follows trauma can prove beneficial in saving the body and the brain. Chapter two chronicles the astonishing technology now being used in medical transplants and the contentious issues these processes excite. Should technology continue to develop apace, how are doctors and patients to choose between using an artificial limb created specifically for a patient, a human limb grown from the patient's own genetic information or the alternative solutions offered by the animal kingdom? And is intervention of true benefit to the patient if it requires a lifetime of immuno-suppressing drugs? The recent successes of the Human Genome Project have dissolved the boundaries of regeneration, with made-to-order organs no longer beyond our limits. Chapter three presents the scientists responsible for engineering human tissue from materials found in the body and outlines how they might help us might claim our lost powers of regeneration. Chapter four relates how we are faring in the battle against the old enemy cancer and tells how experts in this field are trying to regain control of the cancer cells that turn against us. Chapter five explains how we strive to combat the threats we all face living in a modern world teeming with globetrotters who share one feature: we're all potential contagion carriers. *Superhuman* goes on to inform of the dangers of pushing too far to eradicate infectious disease from our lives completely. Chapter six spotlights an area of considerable debate that will possibly alter the course of human evolution: fertility and genetic manipulation. *Superhuman* discusses both the advantages and the dangers of new technologies in this area, arguing that they have many positive applications and that often the hazards are overstated solely through fear. In an attempt never to lose sight of our humanity while inviting the superhuman in us all to work, *Superhuman* encourages a holistic approach to medicine and an open forum for the discussion of the future of medical science.

[Ask A Scientist \(New Edition\)](#) Robert Winston, 2023-04-06

In this unique science book, Professor Robert Winston answers more than 100 real-life questions from children all around the world. Questions cover all the popular science topics including the biology: Why do freckles come in dots on your face? physics: Could you jump off the world, Earth? Why is the sky blue? chemistry: Why are there bubbles in boiling water? natural science: Do dogs cry and space? Why will the Sun explode and make us extinct? This new edition includes eight pages of additional questions relating to the recent hot topics in science, including the COVID-19 pandemic. Robert Winston was inspired to write this book by the many questions posed by his

grandchildren and by children from the schools he has visited over the years The book includes some of these questions plus many more gathered from countries all over the world including the UK Ireland and mainland Europe Canada the USA India China and Japan The questions cover the main science topics chemistry physics biology Earth space and natural science Packed with weird and wacky questions and clear and lively answers Ask a Scientist puts the fun back into science And who could be a better scientist to ask questions to than Professor Robert Winston

That's Life Robert Winston, 2012 Put the buzz back into biology with Professor Robert Winston What makes Earth an ideal place for life to survive Robert Winston will take kids back to Earth's beginnings showing how organisms live and survive in That's Life From the very big to the microscopic meet the animals plants fungi and bacteria that play an important role in sustaining life on Earth Packed with colourful images facts and stats That's Life introduces the features and characteristics of the six main kingdoms of life Let your child discover how life began and just what it means to be alive today

Human Robert M. L. Winston, Don E. Wilson, 2006 Human is the definitive visual guide to understanding who we are from the intricate workings of our bodies and the stages of life we all experience to the extraordinary power of our minds Dramatic illustrations provide an astonishing insight into how the body works and help explain how science is finally unravelling the mind's mysteries A team of experts led by author and broadcaster Robert Winston examine the way we behave both as individuals and as members of complex societies revealing the spectacular variety of human culture as expressed by our customs and rituals art and beliefs language and technology

Bad Ideas? Robert Winston, 2010 We are born with the instinct to create and invent Indeed our ability to do so is what separates us humans from the rest of the animal world The moment man first converted a stone to a useful tool set him on a relentless path toward greater control and power over his environment But have our creative ideas always produced desirable results in line with their original good intention How many ill effects and dangers have they brought about along the way And have they really served us well Bad Ideas traces the fascinating history of our attempts at self improvement but also questions their value The dubious consequences of the development of weaponry for example is self evident from the primitive but lethal sling to the devastating nuclear bomb But what of apparently more innocuous inventions such as farming writing or medicine All were initiated for the greater good but have nonetheless produced unforeseen fallout that continues to this day What are their undesirable side effects how did they emerge over the years and where will they take us in the future Written against a huge historical canvas we join Robert Winston on a thrilling and inspiring journey from our earliest days to the present We learn about the history of modern science engineering IT and much more following the unexpected twists and turns of their progress We meet the individuals who played a key role in their development and share quirky anecdotes about their lives and brainwaves Inspiring unusual and at times controversial Bad Ideas enables us by appreciating the past to look forward to the technological opportunities and ethical challenges of the future In so doing it celebrates man's extraordinary capacity for achievement whilst warning us that his good intentions can sometimes end up as

thoroughly bad ideas **Ask A Scientist** Robert Winston,2019-06-06 This fun and friendly science book for kids poses 100 real life questions from kids to Robert Winston on every aspect of science Questions cover all the popular science topics including human body Why do freckles come in dots on your face physics Could you jump off the world Earth Why is the sky blue chemistry Why are there bubbles in boiling water natural science Do dogs cry and space Why will the Sun explode These are real questions from children from around the world and their questions are their very own Robert Winston was inspired to write this book by the many questions posed by his grandchildren and by children from the schools he has visited over the years The ebook includes some of these questions plus many more gathered from countries all over the world including the UK Ireland and mainland Europe Canada the USA India China and Japan The response to the survey that DK sent out was fantastic there were so many great questions to choose from The questions were carefully selected to cover the main science topics chemistry physics human body Earth space and natural science They are fun engaging and include some that most adults wouldn't dare ask Includes weird and wacky questions and clear and lively answers Ask a Scientist puts the fun back into science *Ask a Scientist* Robert M. L. Winston,2019-06-04 This fun and friendly science book for kids poses 100 real life questions from kids to Robert Winston on every aspect of science Questions cover all the popular science topics including human body Why do freckles come in dots on your face physics Could you jump off the world Earth Why is the sky blue chemistry Why are there bubbles in boiling water natural science Do dogs cry and space Why will the Sun explode These are real questions from children from around the world and their questions are their very own Robert Winston was inspired to write this book by the many questions posed by his grandchildren and by children from the schools he has visited over the years The book includes some of these questions plus many more gathered from countries all over the world including the UK Ireland and mainland Europe Canada the USA India China and Japan The response to the survey that DK sent out was fantastic there were so many great questions to choose from The questions were carefully selected to cover the main science topics chemistry physics human body Earth space and natural science They are fun engaging and include some that most adults wouldn't dare ask Packed with weird and wacky questions and clear and lively answers Ask a Scientist puts the fun back into science **All About Chemistry** Robert Winston,2015-10-21 An explosive look at chemistry with Robert Winston All about Chemistry answers all those intriguing questions your kids ask Why are helium balloons lighter than air What are the secrets of the Philosopher's Stone All About Chemistry takes an amazing look at the what why and how of science From the geeky Greeks to explosive elements kids can enter a world of discovery as they find out the extraordinary way our world works It's chemistry but not as you know it **The Human Mind** Robert M. L. Winston,2004 Robert Winston takes us deep into the workings of the human mind revealing how our senses emotions and personality are the result of a ballet of genes and environment that shapes the path of our lives *Science Lab* Robert Winston,2019-02-07 From building a bridge and crafting a catapult to making a marble run and creating a crane Science Lab includes activities that young readers can do at

home to explore discover and understand the way the world works How are rockets fired into space How is energy harnessed How do buildings survive earthquakes With fun hands on projects and experiments this book reveals how science technology engineering and maths are woven through the world around us Simple steps guide readers through the stages of each project with spotlights on the key science technology engineering and maths learning involved in each project along the way Take it further panels encourage young readers to experiment and take their projects to the next level developing their independence initiative and creative thinking skills With a focus on STEM subjects science technology engineering and maths across school curricula to prepare children for the modern world Science Lab will inspire and engage inquisitive young readers It s perfect for school projects homework help and firing up imaginations

The Story of God Robert M. L. Winston,2005 From a leading voice in the debate on genetic engineering comes a look at the contemporary relationship of science and religion It begins with the primitive worship of our early ancestors and concludes with a vivid portrait of faith in the modern world

Robert Winston: the Story of Science Robert Winston,2023-12-12 Delve into the stories of history s most influential scientific experiments inventions and life changing discoveries that have impacted our understanding and changed the world Let Professor Robert Winston take you on a scientific journey through human history as you learn the stories behind humanity s great inventions and discover everything that science has given us Robert Winston s Science That Changed the World features fascinating facts innovative inventions and daring discoveries Learn how random accidents have led to some of the greatest findings our world has ever seen and how anybody who dares to dream can be successful From the creation of dynamite and the world s first printer to magical medicine and the discovery of soap science really is the pioneering study that has the power to change everything
