Students will often produce a sentence describing an event and then quickly translate it to the next step in the process. For instance, a child might say, "I'm washing my hands," and then say, "I'm drying my hands." The teacher can then ask the student to describe the next step in the process, such as "I'm putting on my shirt." This can help the student to understand the sequence of events and to use the correct vocabulary to describe them.
