New York Math: Math A ,2000 New York Math: Math B ,2000 *Engaging (with) Mathematics and Learning to Teach. An Integrated Approach to Mathematics Preservice Education* Hilary Povey,2017-07-31 Mathematics education research indicates the value of a meaning making and problem solving approach to the teaching mathematics in primary and lower secondary classrooms Yet teachers most of whom have not experienced such pedagogies in their own mathematics learning often find it difficult to implement such approaches Based on over twenty five years in mathematics preservice education this book is intended to support preservice tutors and their students in bridging this gap The book takes six topics from the primary and lower secondary curriculum place value number systems the four rules of number polygons their properties and their symmetries natural numbers including factors multiples powers and simple number theory fractions decimals and irrational numbers and polyhedra Each topic is located very briefly in the research literature and its place in or linked to the primary and lower secondary curriculum is discussed Relevant mathematical activities follow many of which can transfer directly from the university to the school classroom with very little adaptation The final topic chapter is rather different It deals with group theory an aspect of mathematics which is related to primary and lower secondary mathematics structurally but not in terms of recognisable content There is an emphasis throughout on the need to reflect on mathematical experience to develop sensitivity and self awareness and to promote an approach to the subject that is creative and inclusive

Mathematics Teaching ,1965 Incorrect Thoughts John Leo, In this new volume of political essays and social commentary John Leo offers a lively alternative to the Washington oriented slant of much political journalism Rejecting the dry insider s air of knowing punditry Leo s conversational style and acerbic wit engage the reader with his insightful and humorous views of what is going on in education law advertising television the news media language and the various liberation movements that are shaping and sometimes convulsing the country The unifying thread of *Incorrect Thoughts* is the emergence of Political Correctness and its diffusion throughout American social and cultural life Most of the media have viewed the rise of PC as a collection of unimportant oddball anecdotes but Leo perceives it as a coherent social movement sweeping through colleges and schools the courts the media the feminist movement and the art world Its goals are traditional goals of the left equality inclusion liberation racial justice but as Leo notes the tactics employed are often less than noble and the contempt for tradition standards and Western culture has grown each year The new orthodoxy has developed a taste for censorship and coercion Speech codes and anti harassment policies are used as weapons to silence and intimidate opponents Speakers have been shouted down and whole editions of college newspapers stolen to keep students from reading the arguments of conservatives and moderates Readers will find here judicious and often devastating appraisals of self esteem and therapeutic trends in education of efforts to revamp history along multicultural lines and of the extremities and absurdities of identity politics among other of the latest fashions in radical chic Drawing from ideas first presented in his U S

News and World Report columns Leo charts the political fever of a contentious and disordered period in American society At the same time his pointed humor long term perspective and strong moral edge ensures his continuing importance to the debates of our time This book will interest those who share Leo s concerns as well as those who appreciate models for incisive political commentary John Leo is editor of the weekly syndicated column On Society in U S News and World Report He has been a staff writer for Time magazine the New York Times and Commonweal He lives in New York City with his wife and children Incorrect Thoughts provides an opportunity to view in some breadth Mr Leo s compelling vision of the way we live now Daniel J Silver Wall Street Journal
