

## Preparation

Prior to beginning the installation the machine should be studied to determine the Encoder(s) position and to ensure the brackets are suitable, or if custom brackets are required.

In order to reduce erroneous readings caused by machine wear it is recommended that the encoder be fitted as close to the machine lead screw or axial drive shaft as possible.

## Warnings

If for any reason the machine axis travel is greater than the actual scale travel, 'mechanical stops' should be fitted to the machine to avoid damage caused by over-travel. Newall will not accept responsibility for encoder damage caused by machine over-travel.

It is important the Scale be kept at least 13mm (0.5") away from any magnetic sources such as magnetic bases or chucks.
