The Essential Questions Elizabeth Keating, Ph.D., 2022-11-15 Uncover new sides of family members you've known your entire life with this indispensable guide that includes space for journaling Just as the oral histories of people around the world are disappearing amid rapid change there is a risk that your family's personal stories too will be lost forever In The Essential Questions anthropologist Elizabeth Keating helps you to uncover the unique memories of your parents and grandparents and to create lasting connection with them in the process As you seek to learn more about your family history how do you get beyond familiar anecdotes and avoid the frustration of oppositional generational attitudes By asking questions that make the familiar

strange anthropologists are able to see entirely different perspectives and understand new cultures Drawing on her lifelong work in this field Keating has developed a set of questions that treat your parents and grandparents not just as the people who raised you but as individuals of a certain society and time and as the children teenagers and young adults they once were The Essential Questions helps you to learn about the history of your elders to see the world through their eyes and to honor the language they choose to describe their experiences **Now That's a Good Question!** Erik M.

Jenlink,Karen Embry

Jenlink,2019-04-13 STEM Teaching An Interdisciplinary Approach breaks from the more historical idea of making knowledge within disciplines and seeks to engage the reader in a growing conversation that is gaining momentum and is focused on an interdisciplinarity of STEM education which seeks to embrace and or present emerging perspectives on the standards Importantly the conversation on STEM education and interdisciplinary approaches to teacher preparation may draw into specific relief the respective professional and or disciplinary standards for each of the four STEM disciplines as each relates to fostering an interdisciplinary approach The importance and relevance of this interdisciplinary perspective to teacher preparation lies in the realization that STEM literacy moves into everyday lives and thinking and not just in STEM related disciplines This means that faculty in teacher preparation need to extend the range of STEM literacy in pedagogical strategies so that STEM teaching is enriched with multimodal literacies into teaching and learning which in turn makes STEM knowledge more relevant and engaging for its manifest connections to solving the problems that challenge society
