Bond 11+ Test Papers Mathematics Multiple Choice Andrew Baines, 2003-07-07 Brand NEW from Bond a range of up to date facsimile papers designed to match in style and content the real exams set by your LEA or senior independent school Covering all four strands no other test papers have the backing of Bond's unique graded series **Teaching Maths to Pupils with Different Learning Styles** Tandi Clausen-May, 2005-09-28 Tackles an area of the curriculum many teachers lack confidence in Lots of good starting points Spans a lot of material and is strong on diverse learning styles Clear explanation and good visual layout very innovative in approach Judging Panel for NASEN TES Book Award The book is rich in lively teaching suggestions and in insights into the impact of different forms of explanation Debate C carries us away from narrow views of ability and special needs and into the consideration of difference The author takes us through lively discussions of many aspects of mathematics learning Each section offers learning and teaching ideas involving visual and kinaesthetic approaches The book is a compendium of sound ideas rather than a collection of startlingly new approaches But throughout it has the great strength of being exceptionally clear in its arguments descriptions and drawings The design is generally helpful with plenty of illustrations as befits the book's message There are handy pages of photocopiable resources This is a lively and often passionate account of ways of ensuring that multi sensory approaches infect mathematics learning As the author says pictures in the mind can help all pupils We might add They help all teachers too TES Extra for Special Needs If you have found pupils struggling to understand some aspects of mathematics at any age then this book is for you It is a very readable book that would interest all those who work in classrooms whether as a teacher or support worker with all ages and abilities for those who work with older pupils as it gives possible approaches to use with those for whom basic skills are weak or have difficulty in understanding some of the concepts required of GCSE examinations Alison Parish Second in Mathematics Department Stowmarket High School Suffolk Read the full review as posted on the Association of Teachers of Mathematics website It is a highly practical book One strength is the way that it develops a topic from the very basics through to the harder concepts There are a large number of activities that are ready to run but these really are just a starting point for teachers to begin thinking about teaching topics in a different way and from these teachers will be able to develop their own approach Although this book is focusing on pupils who are visual and kinaesthetic learners the great majority of learners adopt a mixture of learning styles so this approach will benefit the entire class Worth a read Maths Coordinator's File This excellent and very informative teaching resource is about teaching mathematics to pupils who have learning differences It is very practical and easy to read A really nice feature is the inclusion of photocopiable resource sheets allowing readers to try out easily the ideas suggested in the book This resource is highly recommended and will be very suitable for maths teachers in primary and secondary schools SENCOs and teaching assistants British Journal of Special Education This book is about making mathematics visible and tangible not something that just lies flat on the page Dipping

into it will provide instantly usable suggestions across a variety of topics at different levels from early number concepts through to fractions and ratios algebra aspects of geometry including angles and circles and data handling When you get a chance to read it more thoroughly you will find arguments for using these approaches consideration of some of the pitfalls to avoid and inspiration to develop different ways of helping students to achieve deep and connected understandings For any teacher who wants to provide students with opportunities for visual and kinaesthetic learning in mathematics The Australian Association of Mathematics Teachers Inc A very good book offering teachers SENCOs and teaching assistants guidelines strategies and practical activities to access the thought processes of pupils with different learning styles It has an easy to read format giving suggestions rather than dictat on the use of models to think and is a unique document for those who have input into the furthering of the teaching and learning of mathematics Mathematics in School How can you make maths exciting and meaningful for all your pupils Some pupils find even basic concepts in mathematics difficult to grasp and it can be a challenge to make lessons accessible to all This book offers practising teachers a range of approaches to making maths clear for struggling students It looks at the different ways in which maths can be taught so that pupils with different learning styles can be stimulated Maths is visible and tangible not something that just lies flat on the page Included are ideas to be used in lessons suggestions for exciting visual ways to teach basic concepts lots of practical advice and guidance The book shows teachers how to unlock mathematics for all their learners and it encourages the use of a variety of methods to teach the subject It provides a valuable resource for maths teachers in both primary and secondary schools for SENCOs and teaching assistants and for those delivering initial teacher training or inservice courses Tandi Clausen May is an educational researcher responsible for the development of a range of mathematics curriculum and assessment materials She delivers popular workshops on teaching mathematics around the United Kingdom She also writes regular articles on mathematics teaching for educational journals and newspapers
