Advanced Studies in Pisa *Routledge Handbook of Private Security Studies* Rita Abrahamsen, Anna Leander, 2015-10-08

This new Handbook offers a comprehensive overview of current research on private security and military companies comprising essays by leading scholars from around the world. The increasing privatization of security across the globe has been the subject of much debate and controversy inciting fears of private warfare and even the collapse of the state. This volume provides the first comprehensive overview of the range of issues raised by contemporary security privatization offering both a survey of the numerous roles performed by private actors and an analysis of their implications and effects. Ranging from the mundane to the spectacular from secretive intelligence gathering and neighbourhood surveillance to piracy control and warfare this Handbook shows how private actors are involved in both domestic and international security provision and governance. It places this involvement in historical perspective and demonstrates how the impact of security privatization goes well beyond the security field to influence diverse social economic and political relationships and institutions. Finally this volume analyses the evolving regulation of the global private security sector. Seeking to overcome the disciplinary boundaries that have plagued the study of private security the Handbook promotes an interdisciplinary approach and contains contributions from a range of disciplines including international relations politics criminology law sociology geography and anthropology. This book will be of much interest to students of private security companies global governance military studies security studies and IR in general.

Disaster Management Alejandro Lopez-Carresi, Maureen Fordham, Ben Wisner, Ilan Kelman, Jc Gaillard, 2013-11-12. There is a perennial gap between theory and practice between academia and active professionals in the field of disaster management. This gap means that valuable lessons are not learned and people die or suffer as a result. This book opens a dialogue between theory and practice. It offers vital lessons to practitioners from scholarship on natural hazards disaster risk management and reduction and developments studies opening up new insights in accessible language with practical applications. It also offers to academics the insights of the enormous experience practitioners have accumulated highlighting gaps in research and challenging assumptions and theories against the reality of experience. Disaster Management covers issues in all phases of the disaster cycle preparedness prevention response and recovery. It also addresses cross cutting issues including political economic and social factors that influence differential vulnerability and key areas of practice such as vulnerability mapping early warning infrastructure protection emergency management reconstruction health care and education and gender issues. The team of international authors combine their years of experience in research and the field to offer vital lessons for practitioners academics and students alike.
