economic and serious health concerns because these chemicals are highly carcinogenic and can directly influence the structure of DNA. The resulting genetic defects can lead to fetal misdevelopment and miscarriages. Aflatoxins are also known to suppress immune systems. Razzaghi Abyaneh et al 2013. In a global context, aflatoxin contamination is a constant concern between the 35N and 35S latitude where developing countries are mainly situated. With expanding boundaries of developing countries, aflatoxin contamination has become a persistent problem to those emerging areas. Shams Ghahfarokhi et al 2013. The continuing threat by aflatoxin contamination of food feed and agricultural commodities to the world population has made aflatoxin research one of the most exciting and rapidly developing study areas of microbial toxins. The present research topic includes six review articles, three mini reviews, and four original research articles. Contributors highlight current global health issues arising from aflatoxins and aflatoxigenic fungi and cover important aspects of aflatoxin research, including contamination of crops, epidemiology, molecular biology, and management strategies. Special attention is given to fungus-plant host interactions, biodiversity, and biocontrol, sexual recombination in aflatoxigenic aspergilli, potential biomarkers for aflatoxin exposure in humans, and safe storage programs.

Auto/Biography across the Americas Ricia A. Chansky, 2016-08-05. Auto-biographical narratives of the Americas are marked by the underlying themes of movement and belonging. This collection proposes that the impact of the historic or contemporary movement of peoples to in and from the Americas, whether chosen or forced, motivates the ways in which identities are constructed in this contested space. Such movement results in a cyclical quest to belong and to understand belonging that reverberates through narratives of the Americas. The volume brings together essays written from diverse national, cultural, linguistic, and disciplinary perspectives to trace these transnational motifs in life writing across the Americas. Drawing on international scholars from the seemingly disparate regions of the Americas, North America, the Caribbean, and Latin America, this book extends critical theories of life writing beyond limiting national boundaries. The scholarship included approaches to narrative inquiry from the fields of literature, linguistics, history, art history, sociology, anthropology, political science, pedagogy, gender studies, critical race studies, and indigenous studies. As a whole, this volume advances discourse in auto-biography studies, life writing, and identity studies by locating transnational themes in narratives of the Americas and placing them in international and interdisciplinary conversations.
