Physics Lab Manual Etsu:

Teaching Computing Henry M. Walker, 2018-04-24 Teaching can be intimidating for beginning faculty. Some graduate schools and some computing faculty provide guidance and mentoring but many do not. Often a new faculty member is assigned to teach a course with little guidance input or feedback. Teaching Computing: A Practitioner's Perspective addresses such challenges by providing a solid resource for both new and experienced computing faculty. The book serves as a practical, easy-to-use resource covering a wide range of topics in a collection of focused, down-to-earth chapters. Based on the author's extensive teaching experience and his teaching-oriented columns that span 20 years and informed by computing education research, the book provides numerous elements that are designed to connect with teaching practitioners, including a wide range of teaching topics and basic elements of teaching, including tips and techniques. Practical tone: the book serves as a down-to-earth practitioners' guide. Short, focused chapters. Coherent and convenient organization. Mix of general educational perspectives and computing-specific elements. Connections between teaching in general and teaching computing. Both historical and contemporary perspectives. This book presents practical approaches, tips, and techniques that provide a strong starting place for new computing faculty and perspectives for reflection by seasoned faculty wishing to freshen their own teaching.

July-December. Miscanthus Michael Jones, Mary Walsh, 2013-11-05. Miscanthus is a promising non-food crop yielding high-quality lignocellulosic material which can be used in a number of ways, including energy and fibre production, thatching, and industrial use. This book encompasses the results and recommendations arising from extensive trials and experiments carried out by the leading European research organisations and institutions in the field. Much of the research was performed under the auspices of the Miscanthus Productivity Network established under the European Union's Directorate General for Agriculture (DG VI). This book presents expert guidance on growth conditions and breeding of Miscanthus, potential productivity and economics, environmental aspects, and harvesting, storage, and utilisation. A guide to this increasingly important subject is long overdue and will be welcomed by all those involved in biomass production and renewable energies or assessing the potential of Miscanthus as a non-food crop.
