Physics Grade 11 Nsc 2014 November:

Super Bomb Ken Young, Warner R. Schilling, 2020-02-15 *Super Bomb* unveils the story of the events leading up to President Harry S Truman's 1950 decision to develop a super or hydrogen bomb. That fateful decision and its immediate consequences are detailed in a diverse and complete account built on newly released archives and previously hidden contemporaneous interviews with more than sixty political, military, and scientific figures who were involved in the decision. Ken Young and Warner R. Schilling present the expectations, hopes, and fears of the key individuals who lobbied for and against developing the H bomb. They portray the conflicts that arose over the H bomb as rooted in the distinct interests of the Atomic Energy Commission, the Los Alamos laboratory, the Pentagon, the State Department, the Congress, and the White House. But as they clearly show, once Truman made his decision in 1950, resistance to the H bomb opportunistically shifted to new debates about the development of tactical nuclear weapons, continental air defense, and other aspects of nuclear weapons policy. What *Super Bomb* reveals is that in many ways the H bomb struggle was a proxy battle over the morality and effectiveness of strategic bombardment and the role and doctrine of the US Strategic Air Command.
