Systems E.N. Houstis,R. Vichnevetsky,J.R. Rice,1990-07-03 Most of the well known mathematical software systems are batch
oriented though in the past few years there have been attempts to incorporate knowledge or expertise into these systems A
number of developments have helped in making the systems more powerful and user friendly algorithm parameter selection
for the solution of well defined mathematical engineering problems parallel computing computer graphics technology
interface development tools and of course the years of experience with these systems and the increase in available computing
power have made it practical to fulfill the potential seen in the early years of their development This book covers four main
areas of the subject Application Oriented Expert Systems Advisory Systems Knowledge Manipulation Issues and User
