Chapter 2: One-Dimensional Kinematics

Answers to Even-Numbered Conceptual Questions

An odometer measures the distance traveled by a car. You can tell this by the fact that an odometer has a nonzero reading after a round trip.

No. Their velocities are different because they travel in different directions.

Since the car circles the track its direction of motion must be changing. Therefore, its velocity changes as well. Its speed, however, can be constant.

(a) The time required to stop is doubled. (b) The distance required to stop increases by a factor of four.

Yes, if it moves with constant velocity.

(a) No. If air resistance can be ignored, the acceleration of the ball is the same at each point on its flight. (b) Same answer as part (a).

(a) No. Displacement is the *change* in position, and therefore it is independent of the location chosen for the origin. (b) Yes. In order to know whether an object's displacement is positive or negative, we need to know which direction has been chosen to be positive.

Solutions to Problems and Conceptual Exercises

Picture the Problem: You walk in both the positive and negative directions along a straight line.

Strategy: The distance is the total length of travel, and the displacement is the net change in position. We place the origin at the location labeled "Your house."

Solution: 1. (a) Add the lengths:

2. (b) Subtract x_1 from x_2 to find the displacement.

Insight: The distance traveled is always positive, but the displacement can be negative.

$$(0.75 + 0.60 \text{ mi}) + (0.60 \text{ mi}) = \boxed{1.95 \text{ mi}}$$

$$\Delta x = x_2 - x_1 = 0.75 - 0.00 \text{ mi} = \boxed{0.75 \text{ mi}}$$

Picture the Problem: You walk in both the positive and negative directions along a straight line.

Strategy: The distance is the total length of travel, and the displacement is the net change in position. We place the origin at the location labeled "Your house."

Solution: 1. (a) Add the lengths:

$$(0.60 + 0.35 \text{ mi}) + (0.75 + 0.60 + 0.35 \text{ mi}) = \boxed{2.65 \text{ mi}}$$
