Vitalism and the Scientific Image in Post-Enlightenment Life Science, 1800-2010 Sebastian Normandin, Charles T. Wolfe, 2013-06-15 Vitalism is understood as impacting the history of the life sciences medicine and philosophy representing an epistemological challenge to the dominance of mechanism over the last 200 years and partly revived with organicism in early theoretical biology The contributions in this volume portray the history of vitalism from the end of the Enlightenment to the modern day suggesting some reassessment of what it means both historically and conceptually As such it includes a wide range of material employing both historical and philosophical methodologies and it is divided fairly evenly between 19th and 20th century historical treatments and more contemporary analysis This volume presents a significant contribution to the current literature in the history and philosophy of science and the history of medicine *Pornographers, Hacks, and Blackmailers in Interwar France* H.G. Cocks, 2024-11-14 After the 1881 declaration of press freedom France enjoyed a golden age of print arguably up until the 1950s This book shines a much needed light on one of the key elements of France's new literary age that being the production of pornography of all kinds H G Cocks reveals how publishers and writers both mainstream and clandestine tried to cash in on the vogue for erotic literature which surfaced at the time Though the vast majority of what was produced was no more than risqué or saucy Cocks shows that this was seen as far more dangerous than frank sexual imagery as it was mostly legal and within the range of the ordinary reader *Pornographers Hacks and Blackmailers in Interwar France* reflects on how as a result of this gold rush for what one writer called the faux obscene a great deal of writing journalism and quite a few literary and even political careers were supported by the writing of pornography For some this new wave of indecent literature seemed to be sapping the morale of the Republic while for others it was simply part of the creative literary and journalistic ferment of the period In that sense Cocks convincingly argues the pornographic became part of the curious mixture of cultural energy and malaise that enveloped the struggling French democracy **The Family in Crisis in Late Nineteenth-Century French Fiction** Nicholas White, 1999-01-13 *The Family in Crisis in Late Nineteenth Century French Fiction* first published in 1999 focuses on a key moment in the construction of the modern view of the family in France Nicholas White's analysis of novels by Zola Maupassant Hennique Bourget and Armand Charpentier is fashioned by perspectives on a wide cultural field including legal popular and academic discourses on the family and its discontents His account encourages a close rereading of canonical as well as overlooked texts from fin de siècle France What emerges between the death of Flaubert in 1880 and the publication of Bourget's *Un divorce* in 1904 is a series of Naturalist and post Naturalist representations of transgressive behaviour in which tales of adultery illegitimacy

consanguinity incest and divorce serve to exemplify and to offer a range of nuances on the Third Republic's crisis in what might now be termed family values
