Phytoremediation For Green Energy:

Phytoremediation for Green Energy Münir Öztürk, Muhammad Ashraf, Ahmet Aksoy, Muhammad Sajid Aqeel Ahmad, 2014-10-13 Human demand for energy has grown multi folds in recent years This is the result of rapidly increasing human population which in turn has resulted in increased organic petroleum and inorganic pollution on the biosphere Due to this we are now facing a number of challenges to sustain life on earth For example the increased organic and inorganic pollution in our environment is leading to loss of biodiversity degradation of environment and thus ultimately causing food insecurity In this situation it is imperative to keep updated ourselves with advances on the effects of pollutants tolerance mechanisms and the potential of different plants and microbes in removing these pollutants from the environment For this purpose we invited a number of scientists worldwide to review the current scenario of the problems current development and future prospects of the challenges and their solutions in an International Conference on Plants and Environmental Pollution held in KAYSERİ TURKEY from 6 11 July 2009 The output of this conference has been summarized in the form of this book

Bioremediation and Bioeconomy Majeti Narasimha Vara Prasad, 2015-10-03 Bioremediation and Bioeconomy provides a common platform for scientists from various backgrounds to find sustainable solutions to environmental issues including the ever growing lack of water resources which are under immense pressure due to land degradation pollution population explosion urbanization and global economic development In addition large amounts of toxic waste have been dispersed in thousands of contaminated sites and bioremediation is emerging as an invaluable tool for environmental clean up The book addresses these challenge by presenting innovative and cost effective solutions to decontaminate polluted environments including usage of contaminated land and waste water for bioproducts such as natural fibers biocomposites and fuels to boost the economy Users will find a guide that helps scientists from various backgrounds find sustainable solutions to these environmental issues as they address the topical issues crucial for understanding new and innovative approaches for sustainable development Provides a compilation of new information on phytoremediation not found in other books in the present market The first book to link phytoremediation and the bioeconomy Includes strategies to utilize contaminated soils for producing bioresources and co generation of value chain and value additions products Handbook of Assisted and Amendment-Enhanced Sustainable Remediation Technology Majeti Narasimha Vara Prasad, 2021-06-04 Learn more about phytoremediation technology with this state of the art resource from an internationally recognized editor and leader in his field The Handbook of Assisted and Amendment Enhanced Sustainable Remediation Technology discusses sustainable approaches to the removal of contaminants from the environment or the reduction of their toxicity The distinguished editor has included resources from an internationally recognized group of academics who discuss strategies to increase the effectiveness of phytoremediation Special attention is paid to the use of organic amendments to facilitate soil cleanup and the growth of phytoremediation plants The book includes discussions of new remediation technologies global trends in the

environmental remediation industry and the future challenges and opportunities likely to arise in the short and long term The Handbook of Assisted and Amendment Enhanced Sustainable Remediation Technology provides a compelling case for the cost effectiveness aesthetics and minimal environmental disturbance of phytoremediation Topics covered include A discussion of activated carbon from lignin particularly its use as a sorbent for in situ remediation of contaminated sediments An exploration of fresh and mature organic amendments for phytoremediation of technosols contaminated with high concentrations of trace elements An examination of the revitalization of metal contaminated EDTA washed soil by addition of unpolluted soil compost and biochar A treatment of wheat straw biochar amendments on the removal of polycyclic aromatic hydrocarbons PAHs in contaminated soil Perfect for environmental engineers environmental scientists geologists chemical engineers and landscape engineers Handbook of Assisted and Amendment Enhanced Sustainable Remediation Technology is also an indispensable reference for scientists working in the green chemistry and technology industries biochemical

Pseudomonas Aeruginosa Dinesh Sriramulu, 2019-10-02 *Pseudomonas aeruginosa* though unfamiliar as an aggressive invader has gained importance in the scientific community due to its association with cystic fibrosis (CF) and its ability to construct biofilms resilient to host defense. The chronic nature of CF allows this bacterium to colonize, adapt and evolve at its own pace, thereby causing further complications in CF patients. With its huge genetic repertoire and plasticity of the genome, *P. aeruginosa* has been able to alter its contents by way of deletions, insertions, inversions and so on. Therefore, scientists and researchers are eager to study this bacterium in diverse and unusual niches. Written by experts from around the world, this book describes and discusses the various mechanisms of adaptation and evolution displayed by *P. aeruginosa*.

Handbook of Research on Inventive Bioremediation Techniques Bhakta, Jatindra Nath, 2017-01-26 The rapid progression of technology has significantly impacted population growth, urbanization and industrialization in modern society. These developments, while positive on the surface, have created critical environmental problems in recent years. The *Handbook of Research on Inventive Bioremediation Techniques* is a comprehensive reference source for the latest scholarly information on optimizing bioremediation technologies and methods to control pollution and enhance sustainability and conservation initiatives for the environment. Highlighting pivotal research perspectives on topics such as biodegradation, microbial tools and green technology, this publication is ideally designed for academics, professionals, graduate students and practitioners interested in emerging techniques for environmental decontamination.

Phytosequestration Moonisa Aslam Dervash, Abrar Yousuf, Munir Ozturk, Rouf Ahmad Bhat, 2023-03-16 Most imperative environmental concerns are cultural eutrophication pertaining to industrialization and urbanization, which lead to proliferation of weeds in aquatic environs, disturbing these ecosystems. Alarming increase in CO₂, CH₄, CFCs, N₂O and water vapour in the atmosphere cause enhanced greenhouse effect. Among all these, CO₂ is accountable for 55-60% of total enhanced effect. Phyto and Nutrient sequestration via plants helps storage of atmospheric CO₂ in the vegetation to get rid of contaminants. Carbon and nutrient sequestration can be braided together for sustainable development goals. The chapters adopt the hierarchy as follows: significance of quality environs, quantification and bio-monitoring of culprit contaminants, the issues relevant to global warming and accelerated eutrophication and their ecological impacts, followed by various sequestration technologies.

Microbial Consortium and Biotransformation for Pollution Decontamination Gowhar Hamid Dar, Rouf Ahmad Bhat, Humaira Qadri, Khalid Rehman Hakeem, 2022-05-26 *Microbial Consortium and Biotransformation for Pollution Decontamination* presents techniques for the decontamination of polluted environs through potential microbes, particularly examining the benefits of its broad applicability, sustainability and eco-friendly nature.

Utilizing global case studies to describe practical applications of the technology the book offers insights into the latest research on advanced microbiological tools and techniques for the remediation of severe pollutants from the environment Environmental researchers and environmental managers focusing on pollution and decontamination will find both key contextual information and practical details that are essential in understanding the use of microbial technology for combatting pollutants Recent advancements in the field of NGS next generation sequencing have allowed more detailed genomic bioinformatics and metagenomic analyses of potential environmentally important microbes that have led to significant breakthroughs into key bio degradative pathways With the increase in human activities around the globe toxic pollutants from multiple sources have contaminated the earth on a large number scale Explores advanced microbiological tools and techniques for the remediation of severe pollutants from the environment Presents practical case studies and examples of the use of microbial technology for decontamination from across the globe Provides insights into key elements of microbiological consortia and their role in decontamination particularly the impact of these techniques on sustainability ecology and economy

Bio-Geotechnologies for Mine Site Rehabilitation M.N.V. Prasad, Paulo Jorge de Campos Favas, Subodh Kumar Maiti, 2018-01-02 Bio Geotechnologies for Mine Site Rehabilitation deals with the biological physical chemical and engineering approaches necessary for the reclamation of mine waste As mining has negative effects on natural resources and deteriorates the quality of the surrounding environment this book provides coverage across different types of mining industries which are currently creating industrial deserts overloaded with technogenic waste The book offers cost effective strategies and approaches for contaminated sites along with remediation and rehabilitation methods for contaminated soils and waste dumps It is an essential resource for students and academics but is also ideal for applied professionals in environmental geology mineral geologists biotechnologists and policymakers Deals with global and holistic approaches of abandoned mine land rehabilitation Includes mine waste rehabilitation case studies from around the world Covers integrated technologies such as bioremediation of metalliferous soil Provide strategies for sustainable ecosystems on mine spoil dumps Offers novel methods for the remediation of acid mine drainage
