Fudge, 2017-01-27 A century before Martin Luther and the Reformation, Jan Hus confronted the official Church and helped to change the face of medieval Europe. A key figure in the history of Europe and Christianity and a catalyst for religious reform and social revolution, Jan Hus was poised between tradition and innovation. Taking a stand against the perceived corruption of the Church, his continued defiance led to his excommunication, and he was ultimately burned at the stake in 1415. What role did he play in shaping Medieval Europe? And what is his legacy for today? In this important and timely book, Thomas A. Fudge explores Jan Hus, the man, his work, and his legacy. Beginning his career at Prague University, this brilliant Bohemian preacher was soon catapulted by virtue of his radical and popular theology to the forefront of European affairs. This book fills a real gap in contemporary understanding of the medieval Church and offers an accessible and authoritative account of a most significant individual and his role in history. Jan Hus belongs to the pantheon of extraordinary figures from medieval religious history. His story is one of triumph and tragedy in a time of chaos and change. National Union Catalog, 1981 *Government Reports Annual Index*, 1992 *Architecture and Architects in Socialist Poland* Błażej Ciarkowski, 2025-09-30 The book presents the history of Polish architecture and architects in the years 1944-1989, focusing on selected issues including both the development of architecture itself and the conditions of practicing architecture in the socialist country. The history of

architecture and architects in socialist Poland is described not only from the perspective of an architectural historian and researcher but also from the perspective of active participants in the events described. The text is based on historical sources and literature as well as on numerous interviews with architects and urban planners who played an important role in post war reconstruction, implementation of the socialist realist doctrine, creation of the most significant buildings and monuments and development of the local version of socialist modernism or post modernism. It gives the floor back to those whose voice was hardly heard after the collapse of the socialist system in 1989. The book should become an interesting source of information for those interested in the material culture of former socialist countries. Although it focuses on socialist Poland it can be used as material for comparative studies of mutual relations between East and West in post war Europe as well as for analysis of the situation of architecture and architects in socialist countries.
