UEE4A **Educating the next generation of scientists** Great Britain: National Audit Office, 2010-11-12 The Department for Education has made good progress in improving take up and achievement in areas such as A Level maths and GCSE Triple Science However there has been less success in increasing the number of science teachers improving take up of A Level physics and raising the standards of school science facilities There is evidence that pupils taking Triple Science GCSE are more likely than those studying combined science to choose science subjects at A Level and to achieve higher grades While starting from a low base pupil take up of the three individual sciences has increased by almost 150 per cent in the last five years However by June 2009 almost half of secondary schools still did not offer Triple Science Take up of chemistry and maths A Level has already exceeded the targets for 2014 set by the Department but take up of physics A Level has increased only slightly since 2005/06 Achievement increased across all science subjects and maths at A Level between 2002/03 and

2009 10 Until recently the Department had a target to ensure that all school laboratories were up to a good or excellent standard by 2010 However it did not collect routine data to measure progress against this target and the most recent research available found that science facilities were inadequate in around a quarter of secondary schools Although recruitment of science graduates to train as specialist teachers has increased the Department is not on course to meet the targets set by the previous Government for recruiting more mathematics and physics teachers by 2014
