Fearenside* Plato,1890 Forms and Structure in Plato's Metaphysics Anna Marmodoro,2021 This book investigates the thought of two of the most influential philosophers of antiquity Plato and his predecessor Anaxagoras with respect to their metaphysical accounts of objects and their properties Marmodoro introduces a fresh perspective on these two thinkers ideas showing Plato s theory to be indebted to Anaxagoras s and principally arguing that their core metaphysical concept is overlap overlap between properties and objects in the world She contends that Plato initially endorses Anaxagoras s model of constitutional overlap but subsequently develops his own model of qualitative overlap Overlap is the crux of our understanding of how for Plato objects participate in Forms of how objects are related without relations of the role of Forms as causes and more Marmodoro s interpretation shows Plato to be ground breaking in his understanding of structure as a property in his explanation of composition and in his account of metaphysical emergence

The National Druggist ,1920 *Plato's Philosophy of Science* Andrew Gregory,2015-03-02 In this illuminating book Andrew Gregory takes an original approach to Plato s philosophy of science by reassessing Plato s views on how we might investigate and explain the natural world He demonstrates that many of the common charges against Plato disinterest ignorance dismissal of observation are unfounded and shows instead that Plato had a series of important and cogent criticisms to make of the early atomists and other physiologoi Plato s views on science and on astronomy and cosmology in particular are shown to have developed in interesting ways Thus the book argues Plato can best be seen as a philosopher struggling with the foundations of scientific realism and as someone moreover who has interesting epistemological cosmological and nomological reasons for his approach Plato s Philosophy of Science is important reading for all those with an interest in Ancient Philosophy and the History of Science
