the Middle East Interrogating enemy prisoners Analyzing data from spy satellites and intercepted phone calls All of these are vital intelligence tasks that traditionally have been performed by government officials accountable to Congress and the American people But that is no longer the case Starting during the Clinton administration when intelligence budgets were cut drastically and privatization of government services became national policy and expanding dramatically in the wake of 9 11 when the CIA and other agencies were frantically looking to hire analysts and linguists the Intelligence Community has been relying more and more on corporations to perform sensitive tasks heretofore considered to be exclusively the work of federal employees This outsourcing of intelligence activities is now a 50 billion a year business that consumes up to 70 percent of the U S intelligence budget And it s a business that the government has tried hard to keep under wraps Drawing on interviews with key players in the Intelligence Industrial Complex contractors annual reports and public filings with the government and on the spot reporting from intelligence industry conferences and investor briefings Spies for Hire provides the first behind the scenes look at this new way of spying Shorrock shows how corporations such as Booz Allen Hamilton Lockheed Martin SAIC CACI International and IBM have become full partners with the CIA the National Security Agency and the Pentagon in their most sensitive foreign and domestic operations He explores how this partnership has led to wasteful spending and threatens to erode the privacy protections and congressional oversight so important to American democracy Shorrock exposes the kinds of spy work the private sector is doing such as interrogating prisoners in Iraq managing covert operations and collaborating with the National Security Agency to eavesdrop on Americans overseas phone calls and e mails And he casts light on a shadow Intelligence Community made up of former top intelligence officials who are now employed by companies that do this spy work such as former CIA directors George Tenet and James Woolsey Shorrock also traces the rise of Michael McConnell from his days as head of the NSA to being a top executive at Booz Allen Hamilton to returning to government as the nation s chief spymaster From CIA covert actions to NSA eavesdropping from Abu Ghraib to Guant namo from the Pentagon s techno driven war in Iraq to the coming global battles over information dominance and control of cyberspace contractors are doing it all Spies for Hire goes behind today s headlines to highlight how private corporations are aiding the growth of a new and frightening national surveillance state **Annual Report** South Jersey Transportation Authority,2005

Fritz, 2017-03-21 The turn of the century was accompanied by two historically significant phenomena One was the emergence of computer networks as a vital component of advanced militaries and interdependent global economic systems The second concerned China's rise on the global stage through economic reforms that led to sustained growth and military modernization At the same time Chinese government policies and actions have drawn international criticisms including persistent allegations of online espionage domestic Internet censorship and an increased military capability all of which utilize computer networks These threat perceptions are heightened by a lack of transparency Unlike the United States or the North Atlantic Treaty Organization China does not articulate its strategic doctrine Further open source material on this topic is often contradictory cursory and unclear due in part to the absence of consensus on cyber related terminology and the infancy of this field With a focus on the period 1998 to 2016 this book identifies and analyzes the strategic context conceptual framework and historical evolution of China's cyber warfare doctrine
