Applications of the Unified Protocol for Transdiagnostic Treatment of Emotional Disorders David H. Barlow, Todd J. Farchione, 2017-08-07 Recent conceptualization of anxiety depressive and related emotional disorders emphasize their similarities rather than their differences In response there has been a movement in recent years away from traditional disorder specific manuals for the treatment of these disorders and toward treatment approaches that focus on addressing psychological processes that appear to cut across disorders These transdiagnostic evidence based treatments may prove to

be more cost efficient and have the potential to increase availability of evidence based treatments to meet a significant public health need Among clinicians the Unified Protocol for Transdiagnostic Treatment of Emotional Disorders UP developed by Dr David Barlow and colleagues is the most recognizable and widely used transdiagnostic treatment protocol with empirical support for its use Applications of the Unified Protocol for Transdiagnostic Treatment of Emotional Disorders provides clinicians with a how to guide for using the UP to treat a broad range of commonly encountered psychological disorders in adults Each chapter covers a specific anxiety depressive or related emotional disorder and important transdiagnostic processes are highlighted and discussed in relation to treatment Case studies are employed throughout to illustrate the real world application of this unique cognitive behavioral protocol and to instruct clinicians in the nuts and bolts of assessment case formulation and treatment in accordance with a transdiagnostic perspective
