

CS-3
Compression
Sustainer

INSTRUCTIONS

Please read the instructions carefully.

The BOSS CS-3 is a compression sustainer that produces long sustain without distorting the original sounds. The attack volume adjusts picking forth widely and provides any drive-sound. As having the tone control function, the CS-3 allows wider variation of sound creation. Moreover, featuring the wide range of maximum input level and compression range, it can be used for any electronic musical instrument. In addition, the CS-3 can be used as an ordinary limiter by turning down the sustain volume.

List ,1987 Ecology and Man in Mexico's Central Volcanoes Area G.W. Heil,Roland Bobbink,Nuri Trigo Boix,2012-12-06 The main activities of the economically active population around The Iztacc huatl and Popocat petl volcanoes region lie in the primary sector 65 90% Of the people working in this sector those dependent on agricultural or pastoral activities generally have an income significantly lower than the minimum wage in Mexico Of the activities in the area these agricultural pastoral and forestry activities probably have the most direct effect on the ecology of the volcanoes and its immediate surroundings Traditional farmers producing crops such as beans pumpkins and cucumbers generally work on small fields using traditional methods and animal traction Modern farming geared towards intensive production develops on larger sites making use of modern machinery fertilizers and pesticides As the area under agriculture continues to increase every year the attendant opening of large forested areas soil modification and ensuing erosion make it almost impossible for forest recovery Extensive forestry in the region mainly concerns cutting and collecting wood cutting Pinus branches for torches or for utensils for open fire cooking collection of mushrooms and hunting Although these often clandestine activities seem to be small scale their adverse effects on the forest have been substantial Weekend visitors from Mexico City heavily dominate recreation with tourism concentrated near the roads leading to and inside the park Lacking organization and facilities most recreational activities have had significant environmental impact on the area In many countries the decline of nature has occurred because of changes in land use *Facing the Unexpected in Flight* Jean Pinet,2015-10-28 Airline pilots often have to face sudden unexpected situations that can become potentially dangerous They are trained to deal with these situations but sometimes the lack of time before the situation deteriorates and the associated stress can compromise their basic cognitive sequence and lead to a serious incident or even an accident This book identifies common denominators in pilots reactions to dangerous unexpected events and highlights behavior common to all in complex stressful situations Facing the Unexpected in Flight Human Limitations and Interaction with Technology attempts to clarify the human characteristics at play in stressful situations with the goal of providing a more solid basis for designing aeronautical operating equipment and shaping future automation The book applies an original cognitive analysis method to highlight actual operational behavior within a quick succession of short mental segments lasting less than one minute in all This rational method of assessing

human potential should contribute to a more effective distribution of roles and help to optimize the pilot aircraft interface. The current drive towards total automation together with the drone revolution and questions of cost effectiveness within a global economy raises the question of whether there is a need for pilots onboard aircraft. So after scientifically dissecting human limitations and advantages in terms of flying an aircraft the book concludes with reflections by the author on the possibility and implications of eliminating pilots from aircraft. In this section the author sets aside scientific rigor and provides his sometimes subjective personal opinions on the professional future of airline pilots.
