AVENUE21. Connected and Automated Driving: Prospects for Urban Europe Mathias Mitteregger,Emilia M. Bruck,Aggelos Soteropoulos,Andrea Stickler,Martin Berger,Jens S. Dangschat,Rudolf Scheuven,Jan Banerjee,2021-10-07 This open access publication examines the impact of connected and automated vehicles on the European city and the conditions that can enable this technology to make a positive contribution to urban development The authors argue for two theses that have thus far received little attention in scientific discourse as connected and automated vehicles will not be ready for use in all parts of the city for a long time previously assumed effects from traffic safety to traffic performance as well as spatial effects will need to be re evaluated To ensure this technology has a positive impact on the mobility of the future transport and settlement policy regulations must be adapted and further developed Established territorial institutional and organizational boundaries must be investigated and challenged quickly Despite or indeed because

of the many uncertainties we find ourselves at the beginning of a new design phase not only in terms of technology development but also regarding politics urban planning administration and civil society

Holistic Anatomy Pip Waller, 2012-05-29 An engaging and accessible exploration of human anatomy physiology and pathology through a holistic lens Complementary and alternative approaches to health and medicine have become increasingly widespread as the limits of conventional treatments become more apparent *Holistic Anatomy* presents an authoritative study of anatomy physiology and pathology but it expands the discussion by connecting the science of the body to a variety of alternative modalities to explore how human beings exist within and interact with their environment and how they experience existence in emotional and spiritual terms Author and massage therapist Pip Waller interweaves basic scientific terminology and detailed descriptions with informal and sometimes humorous observations facts and ideas about life The mechanisms structure and functions of the body are explored along with how they relate to spiritual and energetic paradigms emotions and ecological principles The first half of the book covers basic anatomy and physiology describing each major system of the body and how they interrelate This part includes a thoughtful discussion of aging and the dying process The second half focuses on models of health and disease both traditional and holistic Topics include western pathology emotional health five element medicine and the spiritual cause for disease

Machine Learning for Ecology and Sustainable Natural Resource Management Grant Humphries, Dawn R. Magness, Falk Huettmann, 2018-11-05 Ecologists and natural resource managers are charged with making complex management decisions in the face of a rapidly changing environment resulting from climate change energy development urban sprawl invasive species and globalization Advances in Geographic Information System GIS technology digitization online data availability historic legacy datasets remote sensors and the ability to collect data on animal movements via satellite and GPS have given rise to large highly complex datasets These datasets could be utilized for making critical management decisions but are often messy and difficult to interpret Basic artificial intelligence algorithms i e machine learning are powerful tools that are shaping the world and must be taken advantage of in the life sciences In ecology machine learning algorithms are critical to helping resource managers synthesize information to better understand complex ecological systems Machine Learning has a wide variety of powerful applications with three general uses that are of particular interest to ecologists 1 data exploration to gain system knowledge and generate new hypotheses 2 predicting ecological patterns in space and time and 3 pattern recognition for ecological sampling Machine learning can be used to make predictive assessments even when relationships between variables are poorly understood When traditional techniques fail to capture the relationship between variables effective use of machine learning can unearth and capture previously unattainable insights into an ecosystem s complexity Currently many ecologists do not utilize machine learning as a part of the scientific process This volume highlights how machine learning techniques can complement the traditional methodologies currently applied in this field
