Canon Law in the Age of Reforms (c. 1000 to C. 1150) Christof Rolker, 2023-09-29 This monograph addresses the history of canon law in Western Europe between ca 1000 and ca 1150 specifically the collections compiled and the councils held in that time The main part consists of an analysis of all major collections taking into account their formal and material sources the social and political context of their origin the manuscript transmission and their reception more generally As most collections are not available in reliable editions a considerable part of the discussion involves the analysis of medieval manuscripts Specialized research is available for many but not all these works but tends to be scattered across miscellaneous publications in English German French Italian and Spanish one purpose of the book is thus to provide relatively uniform up to date accounts of all major collections of the period At the same time the book argues that the collections are much more directly influenced by the social milieu from which they emerged and that more groups were involved in the development of high medieval canon law than it has previously been thought In particular the book seeks to replace the still widely held belief that the development of canon law in the century before Gratian's *Decretum* ca 1140 was largely driven by the Reform papacy Instead it is crucial to take into account the contribution of bishops monks and other groups with often conflicting interests Put briefly local needs and conflicts played a considerably more important role than central papal reform on which older scholarship has largely focused **Culturally and Socially Responsible Assessment** Catherine S.
