Europe Jean K. Chalaby, 2009-02-19 Today transnational TV networks count among television's most prestigious brands and rank among Europe's leading TV channels. This is the first dynamically told story of the extraordinary journey of transnational television in Europe from struggling origins to its present-day boom. It is based in extensive research into the international television industry and makes full use of its author's remarkable access to leading industry figures from Sky and Turner to Discovery and BBC World. The tale begins with a few cross-border TV channels who fought hostile governments, faced antagonism from the broadcasting establishment and provoked the contempt of advertisers. But Jean Chalaby argues the planets came into alignment for pan-European television in the late 1990s when a transnational shift in European broadcasting was produced. He shows how transnational television and globalization have transformed one another and how transfrontier TV networks reflect and help sustain a global economic order in which the connection between national territory and patterns of production and distribution have broken down.
