Play development in children with disabilities Serenella

Besio, Daniela Bulgarelli, Vaska Stancheva-Popkostadinova, 2016-01-01 This book is the result of the first two year work of Working Group 1 of the network LUDI Play for children with disabilities LUDI is an Action 2014 2018 financed by COST it is a multidisciplinary network of more than 30 countries and almost 100 researchers and practitioners belonging to the humanistic and technological fields to study the topic of play for children with disabilities within the framework of the International Classification of Functioning Disability and Health WHO 2001 The principal objective of this book is to bring the LUDI contribution to the important topic of play in children with disabilities because today an international consensus on the definition of play and disabilities is still lacking The process of ensuring equity in the exercise of the right to play for children with disabilities requests three actions to approach this topic through a common language at least all over Europe to put play at the centre of the multidisciplinary research and intervention regarding the children with disabilities to grant this topic the status of a scientific and social theme of full visibility and recognized authority Children with disabilities face several limitations in play due to several reasons impairments playgrounds toys and other play tools that are not accessible and usable environments and contexts that are not accessible nor inclusive lack of educational awareness and intentionality lack of specific psycho pedagogical and rehabilitative competence lack of effective intervention methodologies Moreover disabled children s lives are dominated by medical and rehabilitative practices in which play is always an activity aiming to reach an objective or to provoke an improvement play for the sake of play is considered a waste of time The concept of play for the sake of play strongly refers to the distinction between play activities and play like activities Play activities are initiated and carried out by the player alone with peers with adults etc for the only purpose of play itself fun and joy interest and challenge love of race and competition ilinx and dizziness etc They have of course consequences on growth and development but these consequences are not intentionally pursued Play like activities are initiated and conducted by an adult with one or more children in educational clinical social contexts they are playful and pleasant but their main objective is other than play e g cognitive learning social learning functional rehabilitation child s observation and assessment psychological support psychotherapy etc This book then contributes to a clear distinction between play and play like activities that hopefully will bring to new developments in play studies

Kids Can Be Kids Shelly J Lane, Anita C Bundy, 2011-11-11 This

groundbreaking text by two noted educators and practitioners with contributions by specialists in their fields presents a comprehensive evidence based approach to pediatric therapy Their work reflects the focus of practice today facilitating the participation of children and their families in everyday activities in the content of the physical and cultural environments in which they live go to school and play The authors describe the occupational roles of children in an ecocultural context and examine the influence of that context on the participation of a child with physical emotional or cognitive limitations

Clearinghouse for Research in Child Life (U.S.),1977 **Movement Skill Assessment** Allen William Burton,Daryl E. Miller,1998 Intended for occupational therapists physical therapists physical education teachers and adapted physical education teachers Provides a detailed history of movement skill assessment its purposes and theoretical underpinnings Then discusses six levels of movement skill assessment and provides eight in depth critiques of popular assessment instruments such as the Test of Gross Motor Development the Movement Assessment Battery for Children Checklist and the Bruininks Oseretsky Test of Motor Proficiency Annotation copyrighted by Book News Inc Portland OR Autism Steven E. Hyman,2013-10-08 First published in 2001 This is Volume 2 in a series on the science of mental health and focuses on Autism It begins with an overview presentation of a case and a recent consensus description of diagnostic instruments for autistic spectrum disorders This is followed by recent epidemiologic data Epidemiology has an enhanced prominence in studies of autism because there is an unresolved controversy about the incidence of new cases of autism In some surveys the incidence of autism appears to be increasing and the controversy is over whether this is a true observation or whether greater diagnostic awareness is leading to the apparent increase This volume attempt to resolve the conflicting data as if autism is indeed on the rise there must be a new significant environmental risk factor which has to be identified with a view to prevention *The Science of Mental Health: Autism* Steven E.
