No Substitute for Competence Simon Lanz, 2020-01-08 Issue ownership theory is a tale of two actors On the one hand it theorizes how parties compete with each other in their struggle for votes On the other hand issue ownership is about the citizen It claims that voters are more likely to support a party if they think it is competent to handle issues they care about This book provides unique insights into the undertheorized and understudied links between party competence and the vote It argues that issue ownership voting or competence based voting consists of three assumptions First voters are primarily interested in having issues handled by a competent party Unlike in other issue voting models this implies that voters are reluctant or unable to deal with the specificities of the exact solution to a political problem Though positional considerations feed into evaluations of party competence other factors are important too This is reflected by the second assumption following which issue handling competence is a subjective preference with various sources Third competence is more decisive in the decision making process if the voter cares deeply about the issue These three assumptions yield the key formula of issue ownership voting

**Who falls for misinformation?** Julia Aspernäs, 2025-09-26 This thesis examines how the tendency to fall for and spread misinformation

is related to first and foremost 1 epistemic beliefs about the nature of truth particularly belief in truth relativism and 2 political identity are leftists and rightists un equally as receptive to misinformation but also 3 politically motivated reasoning the tendency to interpret information in ways that favor one s ideological preferences and 4 analytical thinking whether someone tends to be reflective as opposed jump to conclusions In the three papers of this thesis we examined the relation between these predictors and the tendency to fall for and or spread misinformation within one or more of the following four categories conspiracy theories pseudo profound bullshit nonsensical sentences science misinformation and logical fallacies In Paper I we investigated individuals ability to evaluate political arguments and found that the tendency to fall for logical fallacies and the occurrence of politically motivated reasoning in terms of belief bias judging a logically invalid argument as valid because of the believability or familiarity of its conclusion were similarly distributed across the left right spectrum Analytical thinking overall predicted better ability to evaluate logical fallacies among both leftists and rightists and seemed to help at least rightists avoid belief bias In Paper II we created a measure of belief in truth relativism and disentangled two distinct forms of belief in truth relativism belief in subjectivist truth relativism truth is relative to subjective experience and belief in cultural truth relativism truth is relative to cultural context Belief in subjectivist truth relativism predicted receptivity to both pseudo profound bullshit and conspiracy theories Rightists were more likely than leftists to believe in conspiracy theories In Paper III we examined if belief in subjectivist truth relativism causes the tendency to fall for and spread misinformation In an experiment we attempted to activate 1 subjectivist and 2 realist beliefs about truth in belief in truth realism a statement is true only if it accurately describes reality which exists independently of human perspective but could not draw any conclusions from its null results as the belief activation failed However belief in subjectivist truth relativism did predict receptivity to both pseudo profound bullshit and conspiracy theories and rightists were more likely than leftists to believe in conspiracy theories The tendency to spread science misinformation was positively associated with belief in subjectivist truth relativism and rightist ideology while it was negatively associated with belief in truth realism Overall the work presented in this thesis advances our understanding of who falls for misinformation in several ways We introduce a new theoretically important predictor belief in subjectivist truth relativism and we develop several new promising research paradigms Moreover we replicate the relations between known predictors political identity motivated reasoning and analytical thinking and receptivity to misinformation using these paradigms with preregistered hypotheses and representative samples Denna avhandling undersöker hur tendensen att falla för och sprida missinformation hänger samman med först och främst 1 epistemologiska vertygelser om sanningens natur huvudsakligen tron på sanningsrelativism och 2 politisk identitet och mottaglighet för missinformation o jämnt fördelat mellan vänster och högerpersoner men även 3 politiskt motiverat tänkande tendensen att tolka information i linje med ens politiska preferenser och 4 analytiskt tänkande huruvida en person typiskt sett reflekterande snarare än drar förhastade slutsatser I de tre studier som hör till avhandlingen undersöks

vi relationen mellan dessa psykologiska prediktorer och tendensen att falla för och eller sprida missinformation inom en eller flera av följande fyra kategorier konspirationsteorier pseudo djup bullshit nonsensmeningar vetenskapsmissinformation och logiska felslut I Studie I låt vi deltagare bedöma politiska argument och fann att tendensen att falla för logiska felslut samt för rekommendationen av politiskt motiverat tänkande i termer av belief bias att uppfatta ett logiskt ogiltigt argument som logiskt giltigt eftersom slutsatsen låter trovärdig eller bekant var jämnt fördelad över värderna och ger spektrumet Sammantaget predicerade analytiskt tänkande bättre förmoda att bedöma logiska felslut hos både värderna och hos personer och verkade hjälpa åtminstone hos personer att undvika belief bias I Studie II skapade vi ett mätinstrument på tron på sanningsrelativism och identifierade två distinkta former av tron på sanningsrelativism tron på subjektivistisk sanningsrelativism sanning är relativ till subjektiv upplevelse och tron på kulturrelativistisk sanningsrelativism sanning är relativ till kulturell kontext Subjektivistisk sanningsrelativism predicerade tron på mottaglighet för både pseudo djup bullshit och konspirationsteorier Hos personer var mer benägna än värderna personer att tro på konspirationsteorier I Studie III undersökte vi om tron på subjektivistisk sanningsrelativism orsakar tendensen att falla för eller sprida missinformation I ett experiment försökte vi aktivera 1 subjektivistiska respektive 2 realistiska sätt att se på vad sanning är i tron på sanningsrealism är ett påstått sant endast om det korrekt beskriver verkligheten som anses existera oberoende av människors perspektiv men kunde inte dra några slutsatser från experimentets nollresultat eftersom aktiveringen misslyckades De andra resultaten visade dock att tron på subjektivistisk sanningsrelativism predicerade mottaglighet för både konspirationsteorier och pseudo djup bullshit och att hos personer var mer benägna än värderna personer att tro på konspirationsteorier Tendensen att sprida vetenskapsmissinformation korrelerade positivt med tron på subjektivistisk sanningsrelativism och med ideologi samt negativt med tron på sanningsrealism Sammantaget bidrar denna avhandling och dess studier på flera sätt till vår förståelse för vem som faller för missinformation Vi introducerar en ny teoretiskt viktig prediktor tron på sanningsrelativism och utvecklar flera lovande forskningsparadigm Därtill replikerar vi sambanden mellan kända prediktorer politisk identitet motiverat tänkande och analytiskt tänkande och mottaglighet för missinformation genom att använda dessa paradigmen och representativa urval
