Gnanamanickam,2007-09-29 The idea of developing a comprehensive volume on PLANT ASSOCIATED BACTERIA was born in my mind about 5 years back. I decided therefore that the proposed volume on Plant Associated Bacteria will be a complete volume on plant bacteriology. There are several books on symbiotic and beneficial bacteria. There are also books and volumes on plant pathogenic bacteria. In recent years the plant growth promoting rhizobacteria PGPR has emerged as an important group which has significant applications to crop production and biological disease control. There is a vital need for a comprehensive volume on all plant associated bacteria that also includes epiphytic and endophytic bacteria. In my mind the proposal appeared worthwhile and timely. In the present era of genomics there has been an enhanced interest in the genomics of the plant associated bacteria. Example the Plant Associated Microbe Genome Initiative American Phytopathological Society [www.apsnet.org media/ps_top.asp](http://www.apsnet.org/media/ps_top.asp) Traditional methods of identification of bacteria have been replaced by molecular methods for diagnostics and their phylogeny. This volume tries to carefully document both the traditional and recent methods. To achieve this the contributors have been chosen from among the best experts to provide updated information for a reader who has specific expectations in a volume of this nature. Greenhouse climate control J.C. Bakker, G.P.A. Bot, H. Challa, N.J. van de Braak,2023-08-28 This publication emphasises that an interdisciplinary and multi disciplinary cooperation of scientists throughout the world is important in solving the complex problems facing the greenhouse industry. The book itself is an outstanding example of such cooperation. The aim of the book is to describe and analyse crop production in greenhouses in relation to climate control to redefine the problem of optimal control from a theoretical point of view and to provide a suitable framework for the design of new scientifically based control systems. Though the principles are generally applicable they are discussed against the background of the Dutch greenhouse industry. To provide the reader with some background information the historical developments and the economic position of the Dutch horticultural industry are briefly reviewed in the introductory chapter. This book will certainly become a reference as such an extensive review on the greenhouse crop system and its control is lacking for research and teaching. *Scientia Horticultura Making Plant Life Easier and Productive Under Salinity* Naser Anjum, Asim Masood, Palaniswamy Thangavel, Nafees A. Khan,2023-12-06 Human health is closely linked with the health of the soil which is both a vital resource for feeding the burgeoning global population via agriculture and vital to realizing most of the United Nations Sustainable

Development Goals However increased salinization is significantly impacting the health of soil due to excess accumulation of varied salts e g toxic ions including Cl of Na HCO₃ Ca² and Mg² and sometimes SO₄²⁻ and CO₃²⁻ Unfortunately soil salinization has already affected about 20% of total arable land and 33% of irrigated land Soil salinization negatively affects the health and productivity of plants and crops and thus threatens agriculture and food security worldwide Moreover it is predicted that by 2050 16 2 million ha of land will be affected by salt which is predicted to cause 30% 50% yield losses worldwide Making Plant Life Easier and Productive Under Salinity Updates and Prospects provides a comprehensive overview of salinity and its major impacts Chapters discuss important approaches for making plant life easier and more productive under salinity the scale and complexity of salinity impacts on Sri Lankan rice farming systems salinity stress responses of major metabolites in vitro production of terpene in plants the major mechanisms underlying phytohormone mediated control of salinity impacts in plants and genomics assisted breeding approaches for achieving salinity tolerance in cereal crops
