The aerial photograph will show the site in its natural state, while the ground plan will show the site in its planned state.

Planting A New Perspective:

Planting Noel Kingsbury, Piet Oudolf, 2013-04-09 *Planting A New Perspective* is an essential resource for designers and gardeners looking to create plant rich beautiful gardens that support biodiversity and nourish the human spirit. An intimate knowledge of plants is essential to the success of modern landscape design and *Planting* makes Oudolf's considerable understanding of plant ecology and performance accessible explaining how plants behave in different situations what goes on underground and which species make good neighbors. Extensive plant charts and planting plans will help you choose plants for their structure color and texture as well as the way they perform in the landscape. A detailed directory with details like each plant's life expectancy the persistence of its seedheads its tendency to spread and propensity to self seed this book is a beautiful and invaluable resource.

Hummelo Piet Oudolf, Noel Kingsbury, 2021-03-09 An intimate look at the personal garden of the Dutch landscape designer renowned for his plantings at the High Line in New York City and Lurie Garden at Chicago's Millennium Park. *Hummelo* near the village of the same name in Gelderland in the eastern Netherlands is visited by thousands of gardeners seeking inspiration each year. It is Piet Oudolf's home his personal garden laboratory a former nursery run by his wife Anja and the place where he first tested new designs and created the new varieties of perennials that are now widely available. A follow up to Oudolf's successful *Landscapes* in *Landscapes Hummelo* tells the story of how the garden has evolved over the past three decades since Oudolf, Anja and their two young sons moved onto the property with its loamy sand and derelict wood stove heated farmhouse in 1982. Text by noted garden author and longtime personal friend Noel Kingsbury places *Hummelo* in context within gardening history from The Netherlands counterculture and nascent green movement of the 1960s to prairie restoration in the American Midwest and shows how its development has mirrored that of Oudolf's own outstanding career and unique naturalistic aesthetic. Oudolf has long been at the forefront of the Dutch Wave and New Perennial Style movements in garden design which have ecological considerations at their base. His work stresses a deep knowledge of plants eschewing short lived annuals in favor of perennials that can be appreciated for both structure and blooms in every season. He is credited for leading the way to today's focus on sustainability in garden design. The book will appeal to readers who favor beautiful biodiverse and ever changing plantings seed heads grasses sedges and winter silhouettes. They will be drawn into its pages by lush photography often demonstrating how Oudolf views his own work and providing rare glimpses into his daily life. Short essays highlight important techniques including scatter plants and matrix planting and introduce other famed landscape designers Karl Foerster Henk Gerritsen Rob Leopold Ernst Pagels and Mien Ruys to create a full panorama of the movement. Oudolf now leads.

Planting Design Patrick Mooney, 2019-10-30 Landscape designers have long understood the use of plants to provide beauty aesthetic pleasure and visual stimulation while supporting a broad range of functional goals. However the potential for plants in the landscape to elicit human involvement and provide mental stimulation and restoration is much less well understood. This book meshes the art of
