Coalition Strategies of Marxist Parties Trond Gilberg,1989

During the early part of this decade many individuals both policy makers and scholars wondered about the new look of some communist parties as they billed themselves as potential participants in the pluralistic game of politics in many parts of the world This image was certainly different from the old notion of dedicated revolutionaries who scornfully rejected the existing order and plotted its overflow How genuine was the new look Were the communists sincere when they discussed interaction with other elements of political order in which they operated What were their tactical policies in pursuit of these strategic goals Some of us began to examine these questions more systematically We ran a panel at an academic conference enjoyed the feedback from our colleagues and began the process of writing this book Now several years later it is a finished product after many full scale revisions and updates The topic is still very relevant and that shows the enduring importance of the questions asked a number of years ago Scholars will need to return to this question in the future perhaps the best strategy is a continuous examination of this crucial subject

Conflict Dynamics Alethia H. Cook,Marie Olson Lounsbery,2017-05-15 Conflict Dynamics presents case studies of six nation states Sierra Leone the Republic of Congo Sri Lanka Myanmar Indonesia and Peru In the book Alethia H Cook and Marie Olson Lounsbery examine the evolving nature of violence in intrastate conflicts as well as the governments and groups involved by focusing on the context of the relationships involved the capacities of the conflict s participants and the actors goals The authors first present a theoretical framework through which the changeable mix of relative group capacities and the resulting tactical decisions can be examined systematically and as conflicts evolve over time They then apply that framework to the six case studies to show its usefulness in better understanding conflicts individually and in comparison While previous research on civil wars has tended to focus on causes and outcomes Conflict Dynamics takes a more comprehensive approach to understanding conflict behavior The shifting nature of relative group capacity measured in many different ways coupled with dynamic group goals determines the tactical decisions of civil war actors and the paths a rebellion will take The case studies illustrate the relevance of third parties to this process and how their interventions can influence tactics The progression of violence in conflicts is inextricably linked to the decisions made in their midst These influence future iterations of the conflictual relationship Complex groups on both sides both drive and are driven by the decisions made Understanding conflicts requires that these reciprocal impacts be considered The comparative framework demonstrated in this book allows one to flesh out this complexity

Nelson,Najma Chowdhury,Nājamā Caudhurī,1994-01-01 This is the first book to analyse the complexities of women s political participation on a cross national scale and from a feminist perspective Surveying forty three countries chosen to represent a variety of political systems regions and levels of ecomic development questions of women s status power means and methods of reform are addressed on a global scale Includes chapters on the following countries Argentina Australia Bangladesh Bolivia Brazil Canada China Costa Rica Cuba Czechoslovakia former Egypt France Germany Ghana Great Britain Greece Hong Kong Hungary India Israel Japan Kenya Korea Rebpublic of South Korea Mexico Morocco Nepal The Netherlands Nigeria Norway Palestine Papua New Guinea Peru The Philippines Poland Puerto Rico South Africa Spain Sudan Switzerland Turkey Union of Soviet Socialist Republics former United States Uruguay *The Motherless State* Eileen McDonagh,2009-08-01 American women attain more professional success than most of their counterparts around the world but they lag surprisingly far behind in the national political arena Women held only 15 percent of U S congressional seats in 2006 a proportion that ranks America behind eighty two other countries in terms of females elected to legislative office A compelling exploration of this deficiency TheMotherless State reveals why the United States differs from comparable democracies that routinely elect far more women to their national governing bodies and chief executive positions Explaining that equal rights alone do not ensure equal access to

political office Eileen McDonagh shows that electoral gender parity also requires public policies that represent maternal traits Most other democracies she demonstrates view women as more suited to govern because their governments have taken on maternal roles through social welfare provisions gender quotas or the continuance of symbolic hereditary monarchies The United States has not adopted such policies and until it does McDonagh insightfully warns American women run for office with a troubling disadvantage *News Notes of California Libraries* California State Library,1929 Vols for 1971 include annual reports and statistical summaries *Foreign Commerce Weekly* United States.
