#### Case Study

Read the following case study and answer the questions that follow.

Seventy-seven-year-old Angie had been a widow for 20 years. She was fiercely independent and had run her small farm with minimal assistance since her husband died. In the last few years, her children noticed that Angie had become increasingly forgetful. First, she began forgetting the birthdays of her children and grandchildren, which was highly unlike her. Recently, she forgot that she was supposed to visit her son and his family and failed to show up at the designated time. Last week when her daughter visited, she found a teakettle on the stove that had burned dry when Angie forgot she had started it. Yesterday, her daughter received a call from Angie's nearest neighbor, who had found Angie wandering around in his field unprotected from the cold. At Angie's children's request, the family physician admitted Angie to the hospital, where she was placed on the geropsychiatric unit.

1. Identify relevant assessment data from the information given.

Lives alone, increasing memory loss, confusion, wandering outside the home.

2. What are the two priority nursing diagnoses for Angie?
