

FORM TALYSURF SERIES 2: Setting new standards for Form and

Now with **µlra Windows NT™** software

Since its launch in 1989, the innovative Form Talysurf Series has dominated the world market for form and surface texture measurement. Nevertheless, our constant drive for advanced accuracy, speed and software capability has led to the introduction of Form Talysurf Series 2, incorporating **µlra Windows NT™** software.

Flexible By Design

Form Talysurf Series 2 has been designed to meet the varied and changing needs of industry. A choice of traverse units, software and accessories allow high precision surface finish and form measurements to be made on small, large or complex components, for laboratory design analysis or production batch measurements.

Form Talysurf Series 2 can offer complete flexibility for use in the following ways:

- **Simultaneous form and surface finish measurement**
- **User customisable interface**
- **Programmed, automated batch measurement**
- **On screen comparison to "master" component data**
- **Non contact measurement for delicate surfaces**
- **Three dimensional measurements with in-depth analysis and reporting**
- **Measurement and analysis of aspherical or conical components**
- **Advanced contour analysis**

Revolutionary Precision

The nanometric resolution throughout its **10mm (0.4in)** gauge range makes the PGI the most powerful gauging system available on any form and surface texture instrument.

A significant benefit of Form Talysurf Series 2 is system programmability which enables measurement in X, Y and Z axis (Y axis optional), analysis and results output to be made automatically, without operator intervention.

The ultra software menus are structured in a logical, easy to understand sequence.

The unique wide gauge range/high resolution of Form Talysurf Series 2 allows highly accurate, simultaneous form, waviness and surface measurement of components.
