The M1 Garand Leroy Thompson,2012-05-20 The M1 Garand gave the US infantryman a marked edge during World War II It shot faster and further than enemy infantry rifles and hit harder No less an authority on killing the enemy than General George S Patton called the Garand The greatest battle implement ever devised At a time when opposing forces were armed with bolt action rifles US troops had a highly reliable self loader The eight round clips which were used to load the M1 Garand were however viewed with mixed emotions by the troops on the ground Some Army and Marine Corps troops allegedly felt that the distinctive twang as the Garand s clip was ejected when empty alerted the enemy that the soldiers were reloading and resulted in an

Lockhart,2021-10-19 The fascinating Wall Street Journal story of how military technology has transformed the world The history of warfare cannot be fully understood without considering the technology of killing In Firepower acclaimed historian Paul Lockhart tells the story of the evolution of weaponry and how it transformed not only the conduct of warfare but also the very structure of power in the West from the Renaissance to the dawn of the atomic era Across this period improvements in firepower shaped the evolving art of war For centuries weaponry had remained simple enough that any state could equip a respectable army That all changed around 1870 when the cost of investing in increasingly complicated technology soon meant that only a handful of great powers could afford to manufacture advanced weaponry while other countries fell behind Going beyond the battlefield Firepower ultimately reveals how changes in weapons technology reshaped human history
