*Investigations, Tasks, and Rubrics to Teach and Assess Math* Pat Lilburn, Alex Ciurak, 2010 Provides opportunities for engaging differentiated open ended problem solving experiences Features more than two hundred tasks grouped by content standards that reflect the NCTM Standards and the NCTM Curriculum Focal Points *Rubric Nation* Michelle Tenam-Zemach, Joseph E. Flynn, 2015-04-01 What is a rubric and how are they being used in teacher education and evaluation When did rubrics become ubiquitous in the field of education What impact do rubrics have on students teachers teacher educators and the educational enterprise This book is an edited volume of essays that critically examine the phenomenon of rubrics in teacher education evaluation and education more broadly Rubrics have seen a dramatic rise in use and presence over the past twenty five years in colleges of education and districts across the country Although there is a wealth of literature about how to make rubrics there is scant literature that explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education The chapters included in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education Since rubrics have become indelible in education it is necessary for a fuller nuanced discussion of the phenomenon Creating a book that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool This book is not meant to be a series of chapters dedicated to best practices for creating rubrics nor is this text meant to present all sides of the rubric discussion Rather this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature Differentiating Instruction With Menus Laurie E. Westphal, 2021-09-03 Differentiating Instruction With Menus Algebra I II offers high school math teachers everything needed to create a student centered learning environment based on choice This book uses five different types of menus that students can use to select exciting advanced level products that they will develop so teachers can assess what has been learned instead of using a traditional worksheet format Topics addressed include numbers algebra basics exponents graphs functions polynomials and various equations typically included in the algebra I II curriculum Differentiating Instruction With Menus Algebra I II contains attractive reproducible menus each based on the levels of Bloom's revised taxonomy as well as incorporating different learning styles These menus can be used to guide students in making decisions as to which products they will develop after studying a major concept or unit Grades 9 12 **Thinking Like a Mathematician** Mary-Lyons Walk Hanks, Jennifer K. Center for Gifted Education at William Mary including the development of process skills in various content areas and the enhancement of discipline specific thinking and habits of mind through hands on activities Grade 3

Microliteratures Jesús R. Velasco, 2025-07-15 Microliteratures is an innovative examination of writings done in the margins of medieval manuscripts and early modern books Not always as formal as glosses sometimes feverish and abbreviated these marginal writings or microliteratures are the product of readers thinking with the text at the center of the page Jes s R Velasco argues that microliteratures are not private annotations but rather a humanistic activity performed in the public sphere These marginal engagements with texts are made public to future readers of the same book Surveying the microliteratures of a wide range of medieval and early modern Iberian genres legal religious chivalric and political texts Velasco finds that in the shared space and time of reading microliterary actions and artifacts are also models of public humanities work that connects texts to contemporary issues Microliteratures emerge from this ambitious book as a way of understanding the self as a reflective and politically engaged reader in conversation with past present and future readers as contemporaries

**Rethinking History, Dictatorship and War** Claus-Christian Szejmman, 2011-11-03 The main focus of this book is to analyse and explain rather than merely narrate developments of modern war The volume will present up to date and genuinely original scholarship that has not been previously published This collection deals with three of the most important themes of historical studies the way history is or ought to be written the nature of dictatorships and the nature of wars The primary focus is on modern Europe and two defining experiences in the first half of the twentieth century namely the First and Second World Wars and totalitarian dictatorships Both remain issues of intense debates and with ever widening ramifications It provides a unique overview of the current state of research on three important themes that are of great interest to scholars and students Each essay and a substantial introduction summarises complex findings approaching the topic from a variety of perspectives 19th and 20th century history national and regional history comparative history cartography and biographical intellectual structural social and military history thus challenging traditional interpretations and methodologies and addressing unresolved questions The book brings together a mix of established and younger experts thinking critically about these major themes and writing accessible and stimulating pieces that challenge existing interpretations and suggest ways the subjects are changing The contributors tackle big issues and dare to come up with bold explanations
