A Chance for Change Crystal R. Sanders, 2016-02-10 In this innovative study Crystal Sanders explores how working class black women in collaboration with the federal government created the Child Development Group of Mississippi CDGM in 1965 a Head Start program that not only gave poor black children access to early childhood education but also

provided black women with greater opportunities for political activism during a crucial time in the unfolding of the civil rights movement. Women who had previously worked as domestics and sharecroppers secured jobs through CDGM as teachers and support staff and earned higher wages. The availability of jobs independent of the local white power structure afforded these women the freedom to vote in elections and petition officials without fear of reprisal. But CDGM's success antagonized segregationists at both the local and state levels who eventually defunded it. Tracing the stories of the more than 2 500 women who staffed Mississippi's CDGM preschool centers, Sanders's book remembers women who went beyond teaching children their shapes and colors to challenge the state's closed political system and white supremacist ideology and offers a profound example for future community organizing in the South. *Ensuring All Children Learn* Ishmael I. Munene, 2021-08-23

Ensuring All Children Learn: Lessons from the South on What Works in Equity and Inclusion brings together a rich tapestry of cases from three southern continents focusing on issues germane to the access, learning and retention in basic education in the context of Education for All (EFA). It is a narrative of both the disappointment that the implementation of EFA did not go as envisaged and of policy alternatives and hopes for a brighter future. The focus on Africa, Asia and Latin America permits the reader to appreciate both the diversity of issues central to EFA and the physical spread of the challenges. The book confirms that whereas southern countries have adopted EFA as an overall policy goal, empirical evidence from the case studies uncovers critical lapses in policies and strategies. Four key issues inform the thematic analysis in the book: the overall experience in implementing EFA, the specific challenges faced, the lessons learned and prospects for the future. The solutions to these challenges provide avenues for the attainment of basic education for all school eligible children in tandem with the UN Sustainable Development Goal 4 on education.

Teachers at Their Best Rich Waters, 2018-04-03 The purpose of this book is to change the conversation about teacher induction preparation and development and how we create effective teachers Our national discussion about how to create effective teachers needs to move away from how higher education can do a better job preparing our teachers and move toward how our local schools can do a better job inducting preparing and developing our teachers over a full career There are two interconnected and irrefutable reasons for this First school culture supersedes all rational strategies for teacher development and second teachers learn to teach in the schools where they work not in higher education or any of the alternative routes which the ineffectiveness of higher education teacher preparation have caused to emerge With the affirmation of these postulates this book clarifies that teachers are at their best when they are working together in collaborative cultures where teacher thinking and decision making lead schools in continuous improvement and change Elaborating on the importance of these best conditions for optimal teacher development this book will insist that it is the entirety of a school culture that produces effective teachers and schools with authentic learning communities produce the cultures that produce effective teachers

Betraying Teachers, Betraying Students Rich Waters, 2022-09-28 Schools derived of learning community cultures consistently provide students better learning outcomes than traditional schools The book argues that the current

approach to preparing teachers as independent agents via on campus classes is not only ineffective but deprives teachers of extensive development opportunities The proper location of teacher induction and development is in local schools that are derived of a learning community culture where teachers have a full career of professional development **Teacher Involvement in High-Stakes Language Testing** Daniel Xerri, Patricia Vella Briffa, 2018-04-27 This book advocates that teachers should play an active role in high stakes language testing and that more weight should be given to teacher judgement This is likely to increase the formative potential of high stakes tests and provide teachers with a sense of ownership The implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices The book also considers the arguments against teacher involvement e g the contention that teacher involvement might entrench the practice of teaching to the test or that teachers should not be actively involved in high stakes language testing because their judgement is insufficiently reliable Using contributions from a wide range of international educational contexts the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high stakes language testing It also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy Moreover teacher involvement empowers them to play a role in reforming high stakes language testing so that it is more equitable and more likely to enhance classroom practices High stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers which ultimately benefits all their students **The Structured Literacy Playbook** Melissa Orkin, Sarah Gannon, Alexandria Osburn, 2025-09-02 As educators deepen their knowledge of evidence based literacy practices The Structured Literacy Playbook will offer the resources necessary to build critical fluency and comprehension skills through lessons that weave phonics concepts into vocabulary and book reading activities The content follows a teacher friendly format by centralizing each chapter around a series of lessons that accompany Phonic Books decodable texts and offer instruction across foundational aspects of word knowledge Descriptions and rationale for instructional routines are brief and well illustrated and teachers can access additional lesson materials and demo videos through QR codes **International Handbook of Research on Teachers and Teaching** Lawrence J.
