Location, Space and Place in Religious Education Martin Rothgangel, Kerstin von Brömssen, Hans-Günter Heimbrock, Geir Skeie, 2017 People form attachments to their home their neighbourhood and environment to the region and nation to which they belong They express feelings about space and place especially so in globalized times In religious studies in theology and in education there is a growing interest in spatial theories either as constructed within national borders or within international and transnational spaces The spatial turn has become an acknowledged term in interdisciplinary discourses Although every practice of religious education is situated and contextually dependent religious education RE research until now has not systematically paid attention to this fundamental insight This volume is devoted specifically to clarifying the close relationship between RE practice and spatial and situational conditions After clarifying the main concepts in Part 1 Part 2 includes chapters related to classroom studies while Part 3 focuses on studies about teachers of religious education Part 4 contains studies beyond the classroom such as school chapels churches and inner space All contributions to this volume were developed in the context of the European Network for Religious Education through Contextual Approaches ENRECA which has focused recently on the central issue of space and place

Religious Identity and National Heritage Francis-Vincent Anthony, 2012-05-18 In some parts of our world religion is on the wane losing its thrust of doctrinal authority and communal bonds In other regions it is gaining public significance as a powerful social cultural and political force Secularization theories are less successful in accounting for these differences in religion's role Other theories describe religion in terms of social capital to be invested whenever it offers certain personal social or political benefits and market opportunities allow smart choices Still other theories simply hold that religion corresponds to an inborn need or stable disposition that guarantees a culture's identity and reflects a natural equilibrium of social cohesion There are also critical theories that point to the intrinsic relationship of religion with power and identify it as a major cause of tension and conflict In this book distinguished scholars reflect on these questions and present empirical research about religious identity and national heritage

The Place of the Parish Martin Robinson, 2020-02-28 For a long time it looked as if the idea of the local and therefore of place seen as locality seemed to have lost its relevance Much of the church lost any sense that geographical context matters Yet that tendency to pull people out of their context has played to a consumerist mentality that sees church more as a consumer

choice than a genuine community Now a shift seems to be underway that values locality much more a resurgence of interest in the parish and the importance of the church's presence in community In *The Place of the Parish* Martin Robinson explores this shift considering how it is manifested in a variety of contexts rural inner city Anglican and independent Drawing on specific examples linked to the so called New Parish Movement he demonstrates how a theology of place is made manifest in the mission of the church today

Kjellin,2017-06-16 Religion has played a major role in history affecting the course of events and influencing individuals Today one frequently hears the expression the return of religion but opinions differ as to how this return is to be understood It is clear that modernity and postmodernity have not meant that religion is dead or relegated to society s backyards Religion is still of vital importance for many people It has to some extent changed shape but has not lost its legitimacy and attractiveness to broad groups Religion is public visible and has a sought for voice but it is also wrestling with extremism ignorance and preconceptions Just like ideologies religions are capable of activating diametrically opposite traits in humans It is this dual tension that is implicit in the question mark in this book s title Mending the World This book s aim is to help explore whether how and in what ways religion church and theology can contribute constructively to the future of a global society In thirty one chapters researchers from around the world address the relation between religion and society

Exploring Ordinary Theology Leslie J. Francis,2016-04-15 Ordinary theology characterizes the reflective God talk of the great majority of churchgoers and others who remain largely untouched by the assumptions concepts and arguments that academic theology takes for granted Jeff Astley coined the phrase in his innovative study Ordinary Theology Looking Listening and Learning in Theology arguing that speaking statistically ordinary theology is the theology of God s Church A number of scholars have responded to this and related conceptualizations exploring their theological implications Other researchers have adopted the perspective in examining a range of Church practices and contexts of Christian discipleship using the tools of empirical study Ordinary theology research has proved to be key in uncovering people s everyday lay theology or ordinary dogmatics Exploring Ordinary Theology presents fresh contributions from a wide range of authors who address the theological empirical and practical dimensions of this central feature of ordinary Christian existence and the life of the Church *The Changing World Religion Map* Stanley D. Brunn,2015-02-03 This extensive work explores the changing world of religions faiths and practices It discusses a broad range of issues and phenomena that are related to religion including nature ethics secularization gender and identity Broadening the context it studies the interrelation between religion and other fields including education business economics and law The book presents a vast array of examples to illustrate the changes that have taken place and have led to a new world map of religions Beginning with an introduction of the concept of the changing world religion map the book first focuses on nature ethics and the environment It examines

humankind's eternal search for the sacred and discusses the emergence of green religion as a theme that cuts across many faiths. Next, the book turns to the theme of the pilgrimage, illustrated by many examples from all parts of the world. In its discussion of the interrelation between religion and education, it looks at the role of missionary movements. It explains the relationship between religion, business, economics, and law by means of a discussion of legal and moral frameworks and the financial and business issues of religious organizations. The next part of the book explores the many new faces that are part of the religious landscape and culture of the Global North: Europe, Russia, Australia, and New Zealand, the U.S. and Canada, and the Global South: Latin America, Africa, and Asia. It does so by looking at specific population movements, diasporas, and the impact of globalization. The volume next turns to secularization as both a phenomenon occurring in the Global religious North and as an emerging and distinguishing feature in the metropolitan, cosmopolitan, and gateway cities and regions in the Global South. The final part of the book explores the changing world of religion in regards to gender and identity issues, the political religious nexus, and the new worlds associated with the virtual technologies and visual media.
