Silvan Steiner, Roland Seiler, Nancy J. Cooke, 2017-12-05. In many areas of human life, people perform in teams. These teams' performances depend at least partly on team members' abilities to coordinate their contributions effectively. This includes the making of decisions and the regulation of behavior in reference to the framework provided by the social group and task context. Given the high relevance of a deepened and integrated understanding about the mechanisms underlying coordinated team behavior, the aim of this research topic is to provide a platform for different theoretical and methodological approaches to researching and understanding coordinated team behavior in different task contexts. The articles published in this edition offer a multifaceted insight into current work on the topic. **Catalogue of Title-entries of Books and Other Articles**
