

### Are video games a good way to keep fit?

Nowadays, many teenagers have got video consoles at home and they often like playing active video games. These are good for you for a number of reasons.

First of all, I think that active video games are a good way to keep fit. There are lots of different types of exercise you can do such as basketball, water-skiing and dance and, what's more, you can play them in the comfort of your own home. In my opinion, these games are fun and interactive because you can play them with friends and, if you play online, you don't need to be in the same place as your friend to play.

In addition, you can play them whenever you want. Some people think that it's better to do exercise outside in the fresh air. Although this is true, it's actually difficult to play outside when it's raining or very hot so video games are a good alternative.

To sum up, I believe that video games are a fun and social way to keep fit. I think they are a good option when you can't play outside and they might encourage people to do more exercise.

### Top Tips for writing

Berninger, 2012-05-04 Translation of cognitive representations into written language is one of the most important processes in writing. This volume provides a long-awaited updated overview of the field. The contributors discuss each of the commonly used research methods for studying translation, theorize about the nature of the cognitive and language representations and cognitive linguistic transformation mechanisms involved in translation during writing, and make the case that translation is a higher-order executive function that is fundamental to the writing process. The book also reviews the application of research to practice that is the translation of the research findings in education and the work world for individuals who interact with others using written language to communicate ideas. This volume provides a rich resource for student theorists and empirical researchers in cognitive psychology, linguistics, and education, and teachers and clinicians who can use the research in their work.
