### **Teaching Reading Comprehension to English Learners in Secondary Schools: A Research-Based Approach**

Cekiso, Madoda, Olifant, Florence, Mokhtari, Kouider, 2025-04-23 Teaching reading comprehension to English learners ELs in secondary schools presents unique challenges as these students must navigate the complexities of academic texts and the intricacies of language acquisition. Effective instruction requires a research-based approach that considers the diverse linguistic, cultural, and cognitive backgrounds of these learners. Recent studies highlight the importance of integrating strategies that build both language proficiency and content knowledge, essential for helping ELs develop the skills needed to comprehend complex materials. Fostering metacognitive awareness through strategies like summarizing, questioning, and making connections can empower students to become active and strategic readers. This approach recognizes the need for a supportive, inclusive classroom environment that encourages language development while promoting academic achievement in content areas. Further research may help educators provide English learners with the tools to thrive as capable readers in secondary school. Teaching Reading Comprehension to English Learners in Secondary School: A Research-Based Approach explores various aspects of teaching reading comprehension to English Second Language (ESL) learners in secondary schools. It examines current challenges and evidence-based strategies in reading comprehension. This book covers topics such as language learning, reading strategies, and teacher training and is a useful resource for academicians, researchers, and scientists.
