Politics Of Deafness:

The Politics of Deafness Owen Wrigley, 1997 Lays out the practical steps families can take to adjust to a loved one's hearing loss The book shows how the exchange of information can be altered at fundamental levels what these alterations entail and how they can affect one's ability to understand and interpret spoken communication Owen Wrigley's 'The Politics of Deafness' David J. Kurs, 1998 **The Politics of Visual Language** James Roots, 1999 The Politics of Visual Language is a ground breaking study of the political socialization of children who are deaf Debate has raged for years over how to educate the prelingually deaf those children who cannot acquire language normally that is orally and aurally While the battlelines have been drawn by the proponents of oralism versus manualism and their hearing supporters two linguistic dilemmas facing D deaf people remain constant a conscious choice is always made for them as to the way they will be taught and either method of language acquisition results in a form of marginalization **Identity/Difference Politics** Rita Dhamoon, 2010-01-01 Theories of liberal multiculturalism have come to dominate debates about identity and difference politics in recent contemporary western political theory This book offers a nuanced critique of these debates by questioning liberal multiculturalism's preoccupation with culture and just as important its unintended consequences Identity Difference Politics switches the focus from culture to power Issues of power are examined through accounts of meaning making those processes through which meanings of difference are produced organized and regulated Other forms of identity difference such as whiteness ableism gender and heteronormativity establish the analytic and normative value of Dhamoon's alternative theoretical framework and reveal that an exclusive preoccupation with culture can dissolve into essentialism which too often provides a rationale for state regulation of groups deemed to be too different Students of contemporary political theory multiculturalism identity politics Canadian politics and culture disability studies critical race theory and feminist and gender theory will find it an invaluable resource **Politics of Visual Language** James Roots, 1999-05-25 The Politics of Visual Language is a fascinating and unique perspective on the whole process of political socialization unique because previous studies in this field have assumed that all participants in the process can hear This work studies those who cannot hear and while it attempts an impartial assessment of all educational methodologies will undoubtedly raise new questions within the Deaf community and beyond Sociologists educators medical professionals linguists psychologists and political scientists will have to reconsider the emotional and political effects of current assumptions about the socialization process **Rights, Democracy, and Fulfillment in the Era of Identity Politics** David Ingram, 2004-04-09 Rights Democracy and Fulfillment in the Era of Identity Politics develops a critical theory of human rights and global democracy Ingram both develops a theory of rights and applies it to a range of concrete and timely issues such as the persistence of racism in contemporary American society the emergence of so called whiteness theory the failure of identity politics the tensions between emphases on antidiscrimination and affirmative action in the Americans With Disabilities Act of 1990 the great unresolved issues of

workplace democracy and the dilemmas of immigration policy for the U S and Europe **Disability Politics in a Global Economy** Ravi Malhotra,2016-07-15 While the visibility of disability studies has increased in recent years few have thoroughly examined the marginalization of people with disabilities through the lens of political economy This was the great contribution of Marta Russell 1951 2013 an activist and prominent scholar in the United States and best known for her analyses of the issues faced by people with disabilities This book examines the legacy of Marta Russell bringing together distinguished scholars and activists such as Anne Finger Nirmala Erevelles and Mark Weber to explicate current issues relevant to the empowerment of people with disabilities Drawing from various fields including Law Political Economy Education and History the book takes a truly interdisciplinary approach offering a body of work that develops a dextrous understanding of the marginalization of people with disabilities The book will be of great use and interest to specialists and students in the fields of Political Economy Law and Society Labour Studies Disability Studies Women s Studies and Political Science *Rights and the Politics of Recognition in Africa* Harri Englund,Francis B. Nyamnjoh,2004-09-18 Publisher Description *Disability & the Politics of Education* Susan Lynn Gabel,Scot Danforth,2008 Disability and the Politics of Education An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world s disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches **Sonic Sculpture and the Performative Impulse** Melissa Christine Warak,2025-03-28 This study considers the performativity of sound producing sculptures made in the twenty first century through a cultural history of certain works A subfield of the sound art medium sonic sculpture presents new possibilities in sensory engagement with the viewer creating a mediated experience for eye and ear Contextualized within three linking nodes of sonic engagement sonic sculpture as a socially engaged art listening to history and the use of the human body as the material of sonic sculpture itself each chapter interrogates one or two works by a contemporary artist These in depth

analyses of the works serve as lenses to the artists larger practices and engagements with things that sound Artists covered include Nick Cave Kara Walker Janet Cardiff George Bures Miller and Ragnar Kjartansson The book will be of interest to scholars working in art history sound studies musicology and cultural studies Encyclopaedia Americana. A Popular Dictionary of Arts, Sciences, Literature, History, Politics and Biography. A New Ed.; Including a Copious Collection of Original Articles in American Biography; on the Basis of the 7th Ed of the German Conversations-lexicon ,1849 **Politics and Education** Haim Gordon, This book suggests that the link between politics and education as described in ancient Greece can bring forth a search for excellence Today there exist great possibilities to courageously struggle for excellence Yet these possibilities are often discarded by educators and politicians and strangled by the prevailing corporate capitalist regime **Deaf in Japan** Karen Nakamura,2006 A groundbreaking study of deaf identity minority politics and sign language traces the history of the deaf community in Japan *The Global Politics of Impairment and Disability* Helen Meekosha,Karen Soldatic,2016-01-13 Disability is of central concern to the developing world but has largely been under represented in global development debates discourses and negotiations Similarly disability studies has overlooked the theorists or the social experience of the global South and there has been a one way transfer of ideas and knowledge from the North to the South in this field This volume seeks to redress the processes of scholarly colonialism by drawing together a diverse set of understandings theorizing and experiences The chapters situate disability within the Southern context and support the work of Southern disabled scholars and activists seeking to decolonize Southern experiences knowledges and absences in the field while simultaneously attempting to make an intervention into able bodied mainstream development discourses practices and politics This book was originally published as a special issue of Third World Quarterly Defining the Boundaries of Disability Licia Carlson,Matthew C. Murray,2021-03-07 This ground breaking volume considers what it means to make claims of disability membership in view of the robust Disability Rights movement the rich areas of academic inquiry into disability increased philosophical attention to the nature and significance of disability a vibrant disability culture and disability arts movement and advances in biomedical science and technology By focusing on the statement We are all disabled the book explores the following questions What are the philosophical political and practical implications of making this claim What conceptions of disability underlie it When if ever is this claim justified and when or why might it be problematic or harmful What are the implications of claiming we are all disabled amidst this global COVID 19 pandemic These critical reflections on the boundaries of disability include perspectives from the humanities social sciences law and the arts In exploring the boundaries of disability and the ways in which these lines are drawn theoretically legally medically socially and culturally the authors in this volume challenge particular conceptions of disability expand the meaning and significance of the term and consider the implications of claiming disability as an identity It will be of interest to a broad audience including disability scholars advocates and activists philosophers and historians of disability moral theorists

clinicians legal scholars and artists The Cultural Meaning of Deafness Jennifer Harris,1995 **The Saturday Review of Politics, Literature, Science and Art** ,1860 *Valuing Deaf Worlds in Urban India* Michele Ilana Friedner,2015-06-09

Although it is commonly believed that deafness and disability limits a person in a variety of ways *Valuing Deaf Worlds in Urban India* describes the two as a source of value in postcolonial India Michele Friedner argues that the experiences of deaf people offer an important portrayal of contemporary self making and sociality under new regimes of labor and economy in India Friedner contends that deafness actually becomes a source of value for deaf Indians as they interact with nongovernmental organizations with employers in the global information technology sector and with the state In contrast to previous political economic moments deaf Indians increasingly depend less on the state for education and employment and instead turn to novel and sometimes surprising spaces such as NGOs multinational corporations multilevel marketing businesses and churches that attract deaf congregants They also gravitate towards each other Their social practices may be invisible to outsiders because neither the state nor their families have recognized Indian Sign Language as legitimate but deaf Indians collectively learn sign language which they use among themselves and they also learn the importance of working within the structures of their communities to maximize their opportunities *Valuing Deaf Worlds in Urban India* analyzes how diverse deaf people become oriented toward each other and disoriented from their families and other kinship networks More broadly this book explores how deafness deaf sociality and sign language relate to contemporary society

The Politics of Researching Multilingually Prue Holmes,Judith Reynolds,Sara Ganassin,2022-02-21 This book offers a unique understanding of how researchers linguistic resources and the languages they use in the research process are often politically and structurally shaped and constrained with implications for the reliability of the research The chapters are written by both experienced and novice researchers who examine how they negotiated the use of their own and others linguistic and communicative resources when undertaking their research in politically charged and linguistically and culturally diverse contexts The contributing authors are either from the Global South or engaged in work which is contextualised within the Global South or they face linguistic structural hegemonies in the Global North which challenge their research processes They utilise diverse theoretical methodological and disciplinary approaches to produce a collection of engaging and accessible accounts of researching multilingually in their contexts These accounts will help readers to make theoretically and methodologically informed choices about the political dimensions of languages in their own research when researching multilingually *The Saturday Review of Politics, Literature, Science, Art, and Finance* ,1911
