Margolis, Luc Pauwels, 2011-08-09 This 42 chapter volume represents the state of the art in visual research. It provides an introduction to the field for a variety of visual researchers, scholars and graduate students in art, sociology, anthropology, communication, education, cultural studies, women's studies, ethnic studies, global studies and related social science and humanities disciplines. The SAGE Handbook of Visual Research Methods encompasses the breadth and depth of the field and points the way to future research possibilities. It illustrates cutting edge as well as long standing and recognized practices. This text is not only about research; it is also an example of the way that the visual can be incorporated in data collection and the presentation of research findings. Contributors to the book are from diverse backgrounds and include both established names in the field and rising stars. Chapters describe a methodology or analytical framework, its strengths and limitations, possible fields of application and practical guidelines on how to apply the method or technique. The Sage Handbook of Visual Research Methods is organized into seven main sections: I Framing the Field of Visual Research, II Producing Visual Data and Insight, III Participatory and Subject Centered Approaches, IV Analytical Frameworks and Approaches, V Visualization Technologies and Practices, VI Moving Beyond the Visual, VII Options and Issues for Using and Presenting Visual Research.

The SAGE Handbook of Visual Research Methods Luc Pauwels, Dawn Mannay, 2019-12-10 The second thoroughly revised and expanded edition of The SAGE Handbook of Visual Research Methods presents a wide ranging exploration and overview of the field today. As in its first edition, the Handbook does not aim to present a consistent view or voice, but rather to exemplify diversity and contradictions in perspectives and techniques. The selection of chapters from the first edition have been fully updated to reflect current developments. New chapters to the second edition cover key topics including picture sorting techniques, creative methods using artefacts, visual framing analysis, therapeutic uses of images and various emerging digital technologies and online practices. At the core of all contributions are theoretical and methodological debates about the meanings and study of the visual, presented in vibrant accounts of research design, analytical techniques, fieldwork encounters and data presentation. This handbook presents a unique survey of the discipline that will be essential reading for scholars and students across the social and behavioural sciences, arts and humanities and far beyond these disciplinary boundaries. The Handbook is organized into seven main sections: PART 1 FRAMING THE FIELD OF VISUAL RESEARCH, PART 2 VISUAL AND SPATIAL DATA PRODUCTION METHODS AND TECHNOLOGIES, PART 3 PARTICIPATORY AND SUBJECT CENTERED APPROACHES, PART 4 ANALYTICAL FRAMEWORKS AND PERSPECTIVES, PART 5 MULTIMODAL AND MULTISENSORIAL RESEARCH, PART 6 RESEARCHING ONLINE PRACTICES, PART 7 COMMUNICATING THE VISUAL FORMATS AND CONCERNS.
