

Name: _____ Date: _____

Student Exploration: Populations and Samples

Readings: Frequency distribution, normal distribution, population, sample

Prior Knowledge Question: (Discuss this question with your class.)

a. **Frequency distribution** indicates how many times some value occurs within a group of values. Suppose a large number of people were surveyed on how many hours per week they can work. The following graph shows the frequency distribution of those results, without sampling.

b. How would you approximate shape of the distribution?

c. In the graph, graph on right, which value gives more the frequency distribution might give than the same people could describe the number hours working the year?

Classroom Setup:

In many cases, a frequency distribution is skewed to the right or left. This is because the population is skewed. For example, the frequency distribution of the number of children in a family is skewed to the right. The following graph shows the frequency distribution of the number of children in a family.

a. The random seed represents the distribution of the population. The frequency distribution described above, with a few people listed with one sampling distribution. What is the shape of each distribution? Plot mean _____ Size mean _____

b. About the simulation speed of the way to the left side of the graph to start taking samples from population. Click **Reset** (R) when the simulation is at about 10.

i. What is the mean of each sample? Plot mean _____ Size mean _____

ii. How many of the sample means is the population mean? _____
