How to Look at Student Work to Uncover Student Thinking Susan M. Brookhart, Alice Oakley, 2021-04-07 Are you picking up all your students' work is trying to tell you? In this book, assessment expert Susan M. Brookhart and instructional coach Alice Oakley walk teachers through a better and more illuminating way to approach student work across grade levels and content areas. You'll learn to view students' assignments not as a verdict on right or wrong, but as a window into what students got and how they are thinking about it. The insight you'll gain will help you infer what students are thinking, provide effective feedback, decide on next instructional moves, and grow as a professional. Brookhart and Oakley then guide teachers through the next steps: clarify learning goals, increase the quality of classroom assessments, deepen your content and pedagogical knowledge, study student work with colleagues, and involve students in the formative learning cycle. The book's many authentic examples of student work and teacher insights, coaching tips, and reflection questions will help readers move from looking at student work for correctness to looking at student work as evidence of student thinking.

Janice VanCleave's Super Science Models Janice VanCleave, 2004-08-18 Learn a lot about science as you make models showing how things work. A spectacular model of an active volcano, a fascinating representation of the solar system, scale reproductions of atoms and molecules. In Janice VanCleave's *Super Science Models*, America's favorite science teacher shows you how to make these and other eye-catching science models that will help you show what you know in class or at a science fair. Inside, you'll find easy-to-follow instructions for 25 great models that reveal the worlds of astronomy, biology, chemistry, earth science, and physics. You'll also get helpful hints on displaying your models, including advice on backboards, scale models, stands, and other clever techniques. As with all of Janice VanCleave's books, every project can be created at home or in the classroom with safe, inexpensive materials. Through models of Earth's layers, the states of matter, an electric circuit, and much more, you'll discover how scientists use models to make it easier to describe things and share their ideas. So get ready to have a great time and impress others with what you've learned making these fun, fabulous models.
