## **Nokia Asha 500 User Guide:**

**Closing the Feedback Loop** Björn-Sören Gigler, Savita Bailur, 2014-05-29 This book is a collection of articles written by both academics and practitioners as an evidence base for citizen engagement through information and communication technologies ICTs In it the authors ask how do ICTs empower through participation transparency and accountability Specifically the authors examine two principal questions Are technologies an accelerator to closing the accountability gap the space between the supply governments service providers and demand citizens communities civil society organizations or CSOs that requires bridging for open and collaborative governance And under what conditions does this occur The introductory chapters lay the theoretical groundwork for understanding the potential of technologies to achieving intended goals Chapter 1 takes us through the theoretical linkages between empowerment participation transparency and accountability In Chapter 2 the authors devise an informational capability framework relating human abilities and well being to the use of ICTs The chapters to follow highlight practical examples that operationalize ICT led initiatives Chapter 3 reviews a sample of projects targeting the goals of transparency and accountability in governance to make preliminary conclusions around what evidence exists to date and where to go from here In chapter 4 the author reviews the process of interactive community mapping ICM with examples that support general local development and others that mitigate natural disasters Chapter 5 examines crowdsourcing in fragile states to track aid flows report on incitement or organize grassroots movements In chapter 6 the author reviews Check My School CMS a community monitoring project in the Philippines designed to track the provision of services in public schools Chapter 7 introduces four key ICT led citizen governance initiatives in primary health care in Karnataka India Chapter 8 analyzes the World Bank Institute s use of ICTs in expanding citizen project input to understand the extent to which technologies can either engender a new feedback loop or ameliorate a broken loop The authors analysis of the evidence signals ICTs as an accelerator to closing the accountability gap In Chapter 9 the authors conclude with the Loch Ness model to illustrate how technologies contribute to shrinking the gap why the gap remains open in many cases and what can be done to help close it This collection is a critical addition to existing literature on ICTs and citizen engagement for two main reasons first it is expansive covering initiatives that leverage a wide range of technology tools from mobile phone reporting to crowdsourcing to interactive mapping second it is the first of its kind to offer concrete recommendations on how to close feedback loops
