Information Technology in the Service Economy: Michael Barrett, Elizabeth Davidson, Catherine Middleton, Janice I. DeGross, 2010-05-09 This book represents the compilation of papers presented at the IFIP Working Group 8.2 conference entitled Information Technology in the Service Economy Challenges and Possibilities for the 21 Century. The conference took place at Ryerson University Toronto Canada on August 10-13 2008. Participation in the conference spanned the continents from Asia to Europe with paper submissions global in focus as well. Conference submissions included completed research papers and research in progress reports. Papers submitted to the conference went through a double blind review process in which the program co chairs an associate editor and reviewers provided assessments and recommendations. The editorial efforts of the associate editors and reviewers in this process were outstanding. To foster high quality research publications in this field of study authors of accepted papers were then invited to revise and resubmit their work. Through this rigorous review and revision process 12 completed research papers and 11 research in progress reports were accepted for presentation and publication. Paper workshop sessions were also established to provide authors of emergent work an opportunity to receive feedback from the IFIP 8.2 community. Abstracts of these new projects are included in this volume. Four panels were presented at the conference to provide discussion forums for the varied aspects of IT service and globalization. Panel abstracts are also included here.

Behind the Screen Ari Hakkarainen, 2010-09-10 Behind the Screen unveils Nokia's phenomenal success story through people business initiatives and products. The book explores key moments key technologies and key managers who contributed to the company's growth to become the world's favorite mobile phone brand. In the 1990s Nokia outtrived the traditional telecommunications companies Motorola and Ericsson by introducing innovative products that allowed personalization and gaming and by exploiting new technologies which created businesses that didn't exist before such as ringtones. Once the dot com bubble had burst and 3G licence bidding had driven the industry into a downturn Nokia faced new competition. Microsoft challenged Nokia in software and Samsung and LG in hardware. Yet Nokia was thriving as the competition heated up. It wasn't enough because the biggest disruption in mobile communications was yet to come the Internet. After Apple introduced the iPhone Google gave away an open source operating system for smartphones and Skype generated revenues from a free telephone service it wasn't enough for Nokia just to crank out products for the vast Indian market or tailor phones for AT T or Vodafone. The industry had changed irrevocably. Whereas people in established markets wanted to access their favorite social networking services like Facebook or Twitter using a mobile device people in emerging markets needed their first e mail accounts. That's where Nokia's strategic Internet service Ovi came in. Behind the Screen unfolds the stories of businesses and technologies that Nokia created and turned into global successes or into miserable failures. It might be impossible to

replicate Nokia's success but the stories offer valuable nuggets on how to thrive in global markets Handbook of Research on the Evolution of IT and the Rise of E-Society Habib, Maki, 2018-09-07 Rapid advancement in information and communication technologies have led to interconnected and predominately online interactions in the current era.
